

CRASHFREE INDIA · A CARS24 COMMITMENT

Systems work because we hold them accountable.

An overview of the audit-and-accountability institution for India's roads.

I THE SHIFT

II THE INSTITUTION

III THE PROOF

IV THE PEOPLE

Zero road fatalities
by 2040.

For seventy years, 'driver error' closed the file. The data just reopened it.

59%

of road deaths in India involve no traffic violation by the victim at all.

Ministry of Road Transport & Highways data

Crash records went digital

e-DAR and digitised FIRs make every death traceable to a place, a road design, a file.

Vehicles became identifiable

ANPR cameras and live national vehicle APIs surface repeat offenders instantly.

Failure became attributable

Open data ties deaths to specific junctions, specific processes, specific desks.

Once failure is attributable, it becomes fixable — and someone can be held to fixing it.

485

people are killed on Indian roads every single day.

ONE DEATH EVERY 3 MINUTES

1,77,175

killed in 2024

66%

aged 18–34

1% → 11%

of world's vehicles → of its road deaths

THE FINDING

System failure, unowned.

Three audits of how India responds to a road death. The same defect each time: nobody owns the follow-through.

EXHIBIT A • ROADS

Audits die at submission.

Hazards get reported, studies get filed — and no institution tracks whether a single fix is ever built.

EXHIBIT B • JUSTICE

₹80,000 Cr sits undelivered.

10.46 lakh compensation cases pending. In one Gurugram audit: 102 hit-and-run files since 2022 — 2 settled.

EXHIBIT C • ENFORCEMENT

Repeat offenders stay invisible.

46 crore e-challans issued, ~75% unpaid — while roadside enforcement still stops vehicles at random.

That gap — between what is known and what gets done — is the institutional white space Crashfree India was built to fill.

Not a charity.

The institution India's roads never had.

Crashfree India is the audit-and-accountability layer for road safety — launched June 2025 as a Cars24 commitment, operated by Vision Zero Trust, New Delhi.

Founded June 2025

Launched by Cars24 with the Indian Road Safety Campaign; roots in a decade of IRSC campus audit work.

\$3M over 3 years

Cars24's committed institutional funding — programme-first: 71% of FY26-27 budget goes to programmes.

Vision Zero Trust

Registered public trust; trustees include Cars24 co-founder Gajendra Jangid.

One north star

Zero road fatalities in India by 2040 — pursued as system repair, not sensitisation.

18 cities and counting

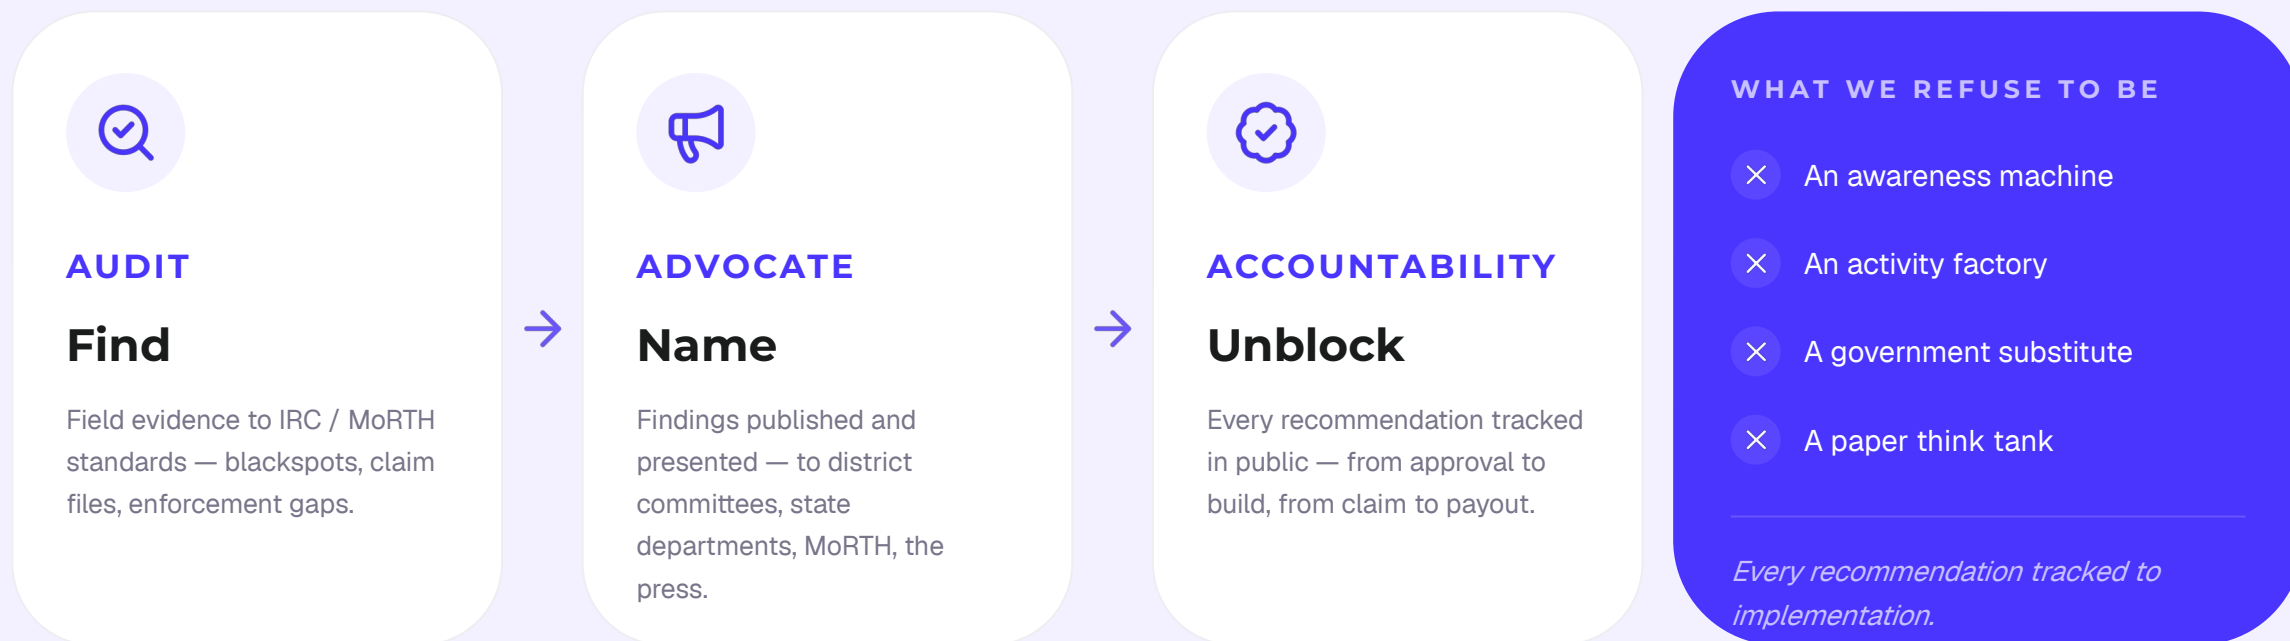

Programmes live across India — Delhi NCR, Jaipur, Indore, Bengaluru, Chennai, Guwahati and more.

MS Dhoni

Goodwill Ambassador since April 2026 — lending India's most trusted voice to the cause.

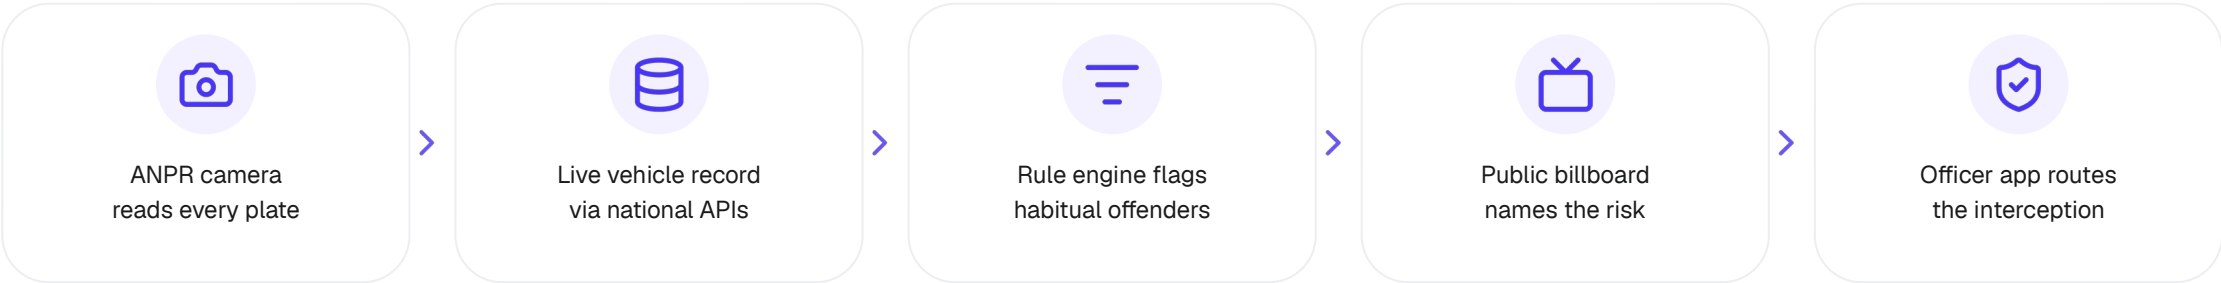

We don't run campaigns. We make the system move.

Institutionally embedded: 4 District Road Safety Committees · MoUs with Jaipur Traffic Police & Gurugram Police · formally tasked by SW Delhi DRSC.

Enforcement that knows which vehicle to stop.

An AI co-pilot for traffic police: every passing plate checked against live national records, so officers intercept the riskiest vehicles — not random ones.

3,00,000+
vehicles scanned

₹30 Cr+
pending challans surfaced

350+
high-risk vehicles intercepted

2 cities live
Jaipur & Bengaluru · 5 police approvals

First 72 hours in Jaipur: 1,240 vehicles flagged, 58 intercepted. · 100 AI challan billboards already live in Gurugram; 12+ cities in discussion.

The law promises ₹80,000 crore. We make it reach families.

THE GAP WE DOCUMENTED

10.46 lakh

compensation cases pending nationwide — ₹80,000 Cr stuck

205 vs ~25,000

hit-and-run claims actually filed vs. eligible crashes (FY22-23)

3.6 years

average wait for a claim — with 20–40 office visits

2 of 102

hit-and-run files settled since 2022 in our Gurugram audit

THE MACHINERY WE BUILT

Aasha — India's first 24/7 multilingual AI compensation chatbot, on WhatsApp and voice

Compensation Calculator on Supreme Court principles (Sarla Verma, Pranay Sethi)

Hospital legal helpdesks — 100+ victims supported in the first 4 days

Embedded in 4 district committees; 'Justice Unserved' findings presented to MoRTH

Hit-and-run claim pipeline being rebuilt with Rajasthan Transport Department

'Justice Unserved' (launched at IIT Delhi, 2026) is now the reference dataset on why crash compensation fails in India.

We publish what the system would rather not know.

Road Defect Repository

AI reads local-language news in 13 languages across 146 districts — potholes, missing signage, unlit stretches — geocoded into public hotspot maps.

Road Safety in Parliament

Every road-safety question since 2014 — 1,423 of them. And a finding: 282 sitting Lok Sabha MPs have never asked one.

SC Litigation Tracker

18 live Supreme Court cases, 190+ orders, with an accountability ledger of deadlines — 11 already overdue at launch.

Crash Data Dashboard

MoRTH's 266-page annual PDFs productised: report cards for 36 states and 50 cities, open CC-BY — the canonical source for our own claims.

The Wire

Twelve months in, the system is answering.

Every figure above is from our public dashboard and quarterly updates — audited numbers, not estimates.

A new captain for road safety.

MS Dhoni joined Crashfree India in April 2026, unveiled at our national forum at IIT Delhi — lending the country's most trusted voice to a systems problem.

- ✓ Voice of 'Be a Rakshak' — recruiting India's students into road audits
- ✓ Champion for safe school zones
- ✓ Amplifier for compensation rights & Aasha

"Because every ride deserves to end safely."
