Working Group 5: Post-Crash Care, Policy Standards & State Implementation

Submitted to the National Road Safety Board

by Crashfree India (Vision Zero Trust) · August 2026

1M+ people reached

18 cities

25+ authority approvals

4 district committees

Crashfree India: a nonprofit working for safer roads

Registered as Vision Zero Trust. Co-founded by Cars24 and the Indian Road Safety Council, June 2025. We follow the global Vision Zero principle: no loss of life on the road is acceptable.

 **Evidence first** Structured field audits, file reviews and research to official standards — not opinion.

 **Institutional collaboration** We work through PWDs, NHAI, transport departments, police and District Road Safety Committees.

 **Youth-led capacity** Trained student teams from IITs, NITs and SPAs add auditing hands the system needs.

 **Technology for follow-through** Public dashboards track every recommendation from submission to completion.

Backed by a US\$3 million, three-year commitment from Cars24 — with programmes, not overheads, receiving 71% of the budget.

One year of work across four connected areas

Each area strengthens the others — audits create data, data supports policy, policy guides the field.

Project Rakshak

Youth-led road safety audits to IRC / MoRTH standards; 31 sites, 25+ approvals, 15 implementations underway.

SATARK & enforcement technology

AI number-plate platform built with traffic police — 3,00,000+ vehicles screened in Jaipur & Bengaluru.

Post-crash support & compensation

'Justice Unserved' research, Aasha chatbot, hospital helpdesks, district committee integration, Rajasthan portal design.

Open data & public education

Four public data platforms; comics, Hindi guides and a pre-hospital care primer.

We build serious public technology — and keep it open

Self-updating platforms that make road-safety work transparent, measurable and usable by government.

Project Rakshak public dashboard — every site, authority and status visible.

Rakshak accountability portal — rakshak.crashfreeindia.org — submission
→ committee ratification → completion

SATARK enforcement platform — ANPR + national vehicle records, officer
app and public compliance billboards

Aasha — 24/7 multilingual AI guide for crash victims, on WhatsApp and voice

Compensation Calculator — Free estimates on Supreme Court principles
(Sarla Verma, Pranay Sethi)

National crash data dashboard — MoRTH statistics productised: report
cards for 36 states, 50 cities

Road defect repository — AI reads local news in 13 languages across 146
districts; hazards mapped publicly

OUR PEOPLE

Academic leadership, senior advisors and a multidisciplinary team

Prof. Geetam Tiwari

Emeritus Professor & Chair, TRIP Centre, IIT Delhi · Member, IRC H-7 Committee on Road Safety Audit

Piyush Tewari

Founder & CEO, SaveLIFE Foundation · Architect of the Good Samaritan Law

BOARD OF ADVISORS

Guided also by Dr. Richa Ahuja (IIT Kharagpur) and an expert network spanning CSIR-CRRI, IRF India, CoERS IIT Madras, IISc, IIT Bombay, IIT Roorkee, IIT Kanpur and the Schools of Planning & Architecture.

Trustees

Amar Srivastava (Founder, Indian Road Safety Council) · Deepanshu Gupta (Founder, IRSC) · Gajendra Jangid (Co-founder, Cars24)

Full-time team

Educated at IIT Delhi, NALSAR & Delhi University (law), TISS (development studies), HKUST — experience across engineering, law, policy, psychology and product

Field strength

75+ road-engineering interns and 31 student audit teams across 18 cities

Goodwill Ambassador

MS Dhoni — voice for youth participation and safer school zones

The mandate, and where we align

Post-crash care, policy standards and state implementation.

EMS	Trauma care	Laws	Standards catalogue	State support	District toolkit
Compensation delivery		'Justice Unserved' research; file-level audits with districts; claim-pipeline rebuild with the Rajasthan Transport Department.			
District machinery		Working inside four District Road Safety Committees — formally tasked by the South-West Delhi DRSC; a fellow embedded with Gurugram district offices.			
Victim-facing standards		Aasha chatbot, Compensation Calculator on Supreme Court principles, plain-language Hindi guides and hospital helpdesks.			
Emergency response		A Pre-Hospital Care Primer benchmarking India's golden-hour response against global standards, with state innovations documented.			

A family experiences many institutions — not one programme

Hospitals, police, district offices, enquiry officers, insurers, legal-services bodies and tribunals each do their part; the journey across them is what we work to simplify.

The hit-and-run claim journey as we mapped it with officials in Jaipur — seven stages across six institutions.

Our work: make each hand-off visible, guide the family at every stage, and give administrators the dashboards to see where files wait.

'Justice Unserved' — the evidence base we built first

Published January 2026 · launched at IIT Delhi · findings presented to MoRTH · cited by national press.

Awareness — 70% of low-income families are unaware compensation exists

Timeliness — 3.6-year average claim; MACT cases often run 8–10 years

Documentation — 90% of pending hit-and-run claims stall on documents alone

Adequacy — Informal workers valued at minimum wage until courts enhance

Equity — 14% of low-income households compensated vs 24% of high-income

Headline finding: only 205 hit-and-run claims were filed in FY22-23 against ~25,000 eligible crashes. The scheme is sound — the pipeline to it needs support.

Working inside the district machinery

We took the research to where claims actually move: District Road Safety Committees and district offices.

Four DRSCs joined

Gurugram, South-West Delhi, North-West Delhi and Jaipur — with formal MoUs with Jaipur Traffic Police and Gurugram Police.

File-level understanding

With Gurugram's administration, we reviewed 102 hit-and-run files from 2022 onwards — mapping exactly where eligible families drop out.

Formally tasked

The South-West Delhi DRSC's signed minutes task Crashfree India with digitisation and analytics support for scheme files.

Embedded presence

A research fellow placed with Gurugram district offices — implementation support, not external commentary.

This is district-toolkit experience in practice — the working knowledge WG-5's state-implementation mandate needs.

With Rajasthan: from mapping to a working template

Supporting the state Lead Agency and Transport Department on the Hit-and-Run Compensation Scheme.

Ground mapping first	Consultations across every office a claim touches in Jaipur — police thanas, DLSA, ADM office, SDM cell, DM and GIC.
What the data showed	Jaipur alone delivers roughly half of Rajasthan's hit-and-run claims (~180 of ~395 in 2025) — active outreach and a single coordination cell explain the difference.
Findings shared as asks	Document standard (7 court-agreed items vs 11–13 demanded), family traceability, stage-wise SLAs and five clarification queries prepared for GIC.
Portal design	A guided-filing, stage-visible case-management portal for the scheme — designed so no stakeholder changes their medium, and officials retain every decision.

Aasha and the tools that guide families through the process

Built so that a family's first hours after a crash come with clear, correct guidance — in their language.

- 

Aasha

India's first 24/7 multilingual AI companion for crash victims — step-by-step guidance on rights, schemes and documents, on WhatsApp and voice.
- 

Compensation Calculator

Free, instant estimates based on Supreme Court principles (Sarla Verma, Pranay Sethi) — strengthening families' position.
- 

Hospital helpdesks

Legal helpdesks in trauma wards — 100+ victims supported in the first four days of operation.
- 

Plain-language education

Comics ('Know Your Rights with Aasha') and Hindi guides covering all three compensation routes, NALSA 15100 and the Cashless Treatment Scheme 2025.

Crashfree India

दुर्घटना के बाद मुआवज़ा: आपका कानूनी अधिकार

अगर आप या आपके परिवार का कोई सदस्य सड़क दुर्घटना में गंभीर रूप से घायल हुआ है या किसी की मौत हो गई है, तो आपको मुआवज़ा (Compensation) मिलना आपका कानूनी हक है।

ये तब भी लागू होता है, अगर:

गाड़ी का इस्तेमाल भाग गया हो

सड़क पर किसी गाड़ी का खोला व हो

अगर साइकल, मoped वगैरह चलाते व घायल हो

अगर किसी पर आपसे कोई खर्चा पड़े

अगर किसी पर आपसे कोई खर्चा पड़े

आपको किस बात का मुआवज़ा मिल सकता है?

इलाज और अस्पताल का खर्च

सड़क दुर्घटना (जैसे सड़क दुर्घटना, सड़क दुर्घटना)

दुर्घटना के दौरान हुआ अर्थिक नुकसान

अचानक या सड़क दुर्घटना

बिना दंड के

यदि दुर्घटना में मृत्यु हुई हो

परिवार को आर्थिक नुकसान

अंतिम संस्कार का खर्च

भविष्य की कमाई का नुकसान

भवनात्मक व पारिवारिक नुकसान

और भी कई तरह की मदद मिल सकती है। आपको अकेले खड़े होने की जरूरत नहीं है।

मुआवज़ा कैसे पाएं?

1

अपने नजदीक पुलिस स्टेशन में FIR दर्ज कराएं।

2

नजदीक DLSA या लीगल एड क्लिनिक से नि: शुल्क कानूनी सहायता लें।

3

कथेम प्रक्रिया के लिए जरूरी सभी दस्तावेज़ इकट्ठा करें।

4

अपने जिले के MACT में क्लेम दर्ज करें।

NALSA Helpline: 15100 (National Legal Services Authority)

दस्तावेज़ जो आवश्यक हैं

आधार कार्ड

FIR कॉपी

मेडिकल बिल

बैंक पासबुक

डिजिटल इलाज (इलाज)

आप या आपके परिवार का सदस्य / कानूनी प्रतिनिधि Motor Accident Claims Tribunal (MACT) में क्लेम कर सकते हैं।
District Legal Services Authority (DLSA) आपको पूरी मदद करेगी।

मदद कहाँ मिलेगी?

Hindi legal-rights guide — hospitals & police stations.

The Pre-Hospital Care Primer: our EMS evidence line

Published September 2025 — benchmarking India's golden-hour response and documenting what states are getting right.

- 

The response gap, measured

ERSS-112 is live in all 36 states and UTs, yet highway ambulance arrival averages 25–35 minutes; the full episode runs 55–75 minutes against a 60-minute global benchmark.
- 

State innovations documented

Maharashtra's MEMS centralised dispatch across 937 ambulances; Tamil Nadu's TAEI model — pre-arrival alerts, trauma registries, automated triage — improving district response times.
- 

Good Samaritan awareness

Bystander protections and the Cashless Treatment Scheme 2025 (₹1.5 lakh / 7 days) explained in our public guides — the demand side of trauma care.
- 

Where this serves WG-5

A ready, referenced baseline for the Group's EMS and trauma-care standards discussions — with state models already compared.

Design principles for public post-crash systems

What we have learned building for the compensation pipeline — offered as reusable standards for any state.

No stakeholder changes their medium

Families use WhatsApp and calls; officials keep their existing files and formats — the system adapts to them, not the reverse.

Officials retain every decision

Technology flags, reminds and organises; sanctioning and verification stay entirely with the designated authorities.

Traceability before automation

Phase 1 simply makes every file findable and every stage visible — the single largest lever we observed.

Single-pass clarification

Objections batched and resolved once, not loops that reset the clock for a family.

Evidence for administrators

Dashboards reveal where files wait, which documents fail and where outreach is needed — reform guided by data.

The numbers WG-5's standards can move

Specialist figures from our research and file work — each one a lever the Group's standards and toolkits can act on.

205 vs ~25,000

hit-and-run claims filed vs eligible crashes (FY22-23)

921 of 1,026

pending claims stalled on documentation alone (Jul 2024)

~60 days

intake latency where claim surfacing waits for bi-monthly meetings

~50%

of FIRs lack a usable family phone number — traceability is the first lever

7 vs 11-13

court-agreed documents vs documents demanded in practice

FY23-24: 12%

of eligible crashes converted to filed claims — improving, far from done

None of these require new legislation. Each responds to a standard, a toolkit entry or a communication norm — exactly what WG-5 exists to produce.

We already work with the claim's other side

Compensation standards only work if insurers, tribunals and legal-services institutions are in the room — we engage all three.

GIC & insurers

Five clarification queries prepared for GIC on MACT-affidavit objections; consultations with IFFCO Tokio and New India Assurance on settlement practice.

Tribunal & legal practice

Guidance from Justice J. R. Midha (Retd., Delhi High Court), architect of the FastDAR process; working partners across MACT courts and DLSAs.

Right-to-information evidence

22+ RTIs filed on scheme performance (12 answered) — building the public record that standards work needs.

Victim-side ground truth

120+ victim and family interactions; 300+ citizens reached through awareness sessions; 30+ expert consultations.

Post-crash care needs more than one discipline

A legally sound framework can still be hard to use; a good portal can still miss district workflows. Our team is built across that whole chain.

Law & policy

NALSAR and Delhi University-trained; scheme analysis, RTIs, MoRTH engagement

Technology & product

IIT-trained; Aasha, calculator, dashboards and portal architecture

Field & development practice

TISS-trained; victim interviews, district engagement, DRSC work

Behaviour & communication

Psychology and design; guides, comics and multilingual communication

Advised by Piyush Tewari (SaveLIFE Foundation), Prof. Geetam Tiwari (IIT Delhi) and Justice J. R. Midha (Retd., Delhi High Court — architect of the FastDAR process), with practitioner partners across MACT courts, DLSAs and insurers.

Four concrete contributions to Working Group 5

- 1

A victim-side evidence base

'Justice Unserved', 120+ victim and family interactions, and file-level audit data showing precisely where eligible families drop out of the process.
- 2

A district toolkit, drawn from practice

Working DRSC integration experience — agendas, file digitisation, fellow placement — ready to be codified into the Group's district toolkit.
- 3

A reusable state portal blueprint

The Rajasthan case-management design — guided filing, stage-wise visibility, single-pass clarification — offered as a template any state can adapt.
- 4

Standards input from the claimant's side

Document standards (the court-agreed 7), communication standards and timeline benchmarks, grounded in what families actually experience.

RECOGNITION

A young organisation the ecosystem already engages with

National Road Safety Implementation Forum, IIT Delhi — April 2026.

National forum at IIT Delhi — 60+ experts; MoRTH, WHO, UNICEF, IRF and CSIR-CRRI participation; hosted with the TRIP Centre

MS Dhoni, Goodwill Ambassador — announced at the forum; covered by Business Standard, The Tribune and The Wire

Research in national press — 'Justice Unserved' covered by Deccan Herald, Economic Times, Fortune India, IndiaSpend, Moneycontrol, Scroll.in and The Wire

Government partnerships — MoUs with Jaipur Traffic Police & Gurugram Police; formal tasking by the South-West Delhi DRSC; Rajasthan Transport Department engagement

We would be honoured to contribute to Working Group 5.

Our evidence, our district relationships, our technology and our expert network are available to the Board — in whichever form is most useful.
