

CRASHFREE INDIA • A CARS24 COMMITMENT

Building safer roads for India — audit by audit, fix by fix.

A nonprofit working alongside government — finding road-safety gaps, getting fixes approved, and staying until they are built.

ROAD INFRASTRUCTURE

ENFORCEMENT TECHNOLOGY

POLICY & VICTIM SUPPORT

YOUTH MOBILISATION

Year one: 1M+ people reached • 18 cities • 25+ government approvals • ₹30 Cr+ unpaid challans surfaced

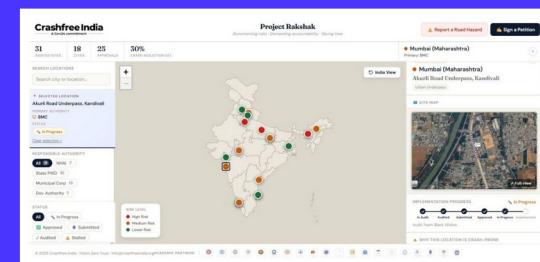

Partner overview • July 2026 • crashfreeindia.org

I THE PROBLEM

II WHO WE ARE

III WHAT WE DO

IV OUR PEOPLE

Live:
crashfreeindia.org/rakshak/dashboard

Goodwill Ambassador: MS Dhoni

India loses 485 lives on its roads every day — most of them preventable with follow-through.

485

people killed every single day

ONE DEATH EVERY 3 MINUTES

MoRTH, Road Accidents in India 2024: 1,77,175 deaths

59%

of road deaths involve no traffic violation by the victim — better road design, supported enforcement and faster post-crash care decide who survives.

- 66% of victims are aged 18–34 — India's workforce bears the loss
- 1% of world's vehicles, 11% of its road deaths — the gap is systemic
- ₹80,000 Cr in compensation undelivered — the failure continues after the crash

India has strong laws and committed institutions. What they need is more capacity for follow-through — that is the gap we fill.

Three pendencies we help the system clear.

We studied how India responds to a road death. Departments know the problems — what they need is dedicated hands, tools and follow-through.

01 · ROAD FIXES PENDING

Audits await execution.

Hazards are identified and studies filed — stretched departments need help converting reports into built fixes.

02 · CLAIMS PENDING

₹80,000 Cr awaits families.

10.46 lakh compensation cases pending. Our Gurugram file audit shows where each claim gets stuck — and how to unblock it.

03 · RECORDS UNUSED

Enforcement lacks live tools.

46 crore e-challans on record, ~75% unpaid. Police need technology that turns records into targeted, fair action.

Our role: give the system the hands, tools and follow-through to convert intent into outcomes on the ground.

A partner to the system — with the hands and tools to finish the job.

A Cars24-backed nonprofit (\$3M over 3 years, run by Vision Zero Trust) working with governments towards zero road deaths by 2040.

OUR PHILOSOPHY

Road deaths are a solvable systems problem. We work as a support layer to government — auditing on the ground, building tools, and staying with every fix until it is done.

AUDIT

ADVOCATE

FOLLOW THROUGH

1M+

FOUR PILLARS OF WORK

Road infrastructure

Project Rakshak — audits that end in built fixes

Enforcement technology

SATARK & AI billboards, run with police

Policy & victim support

Aasha, compensation research, district committees

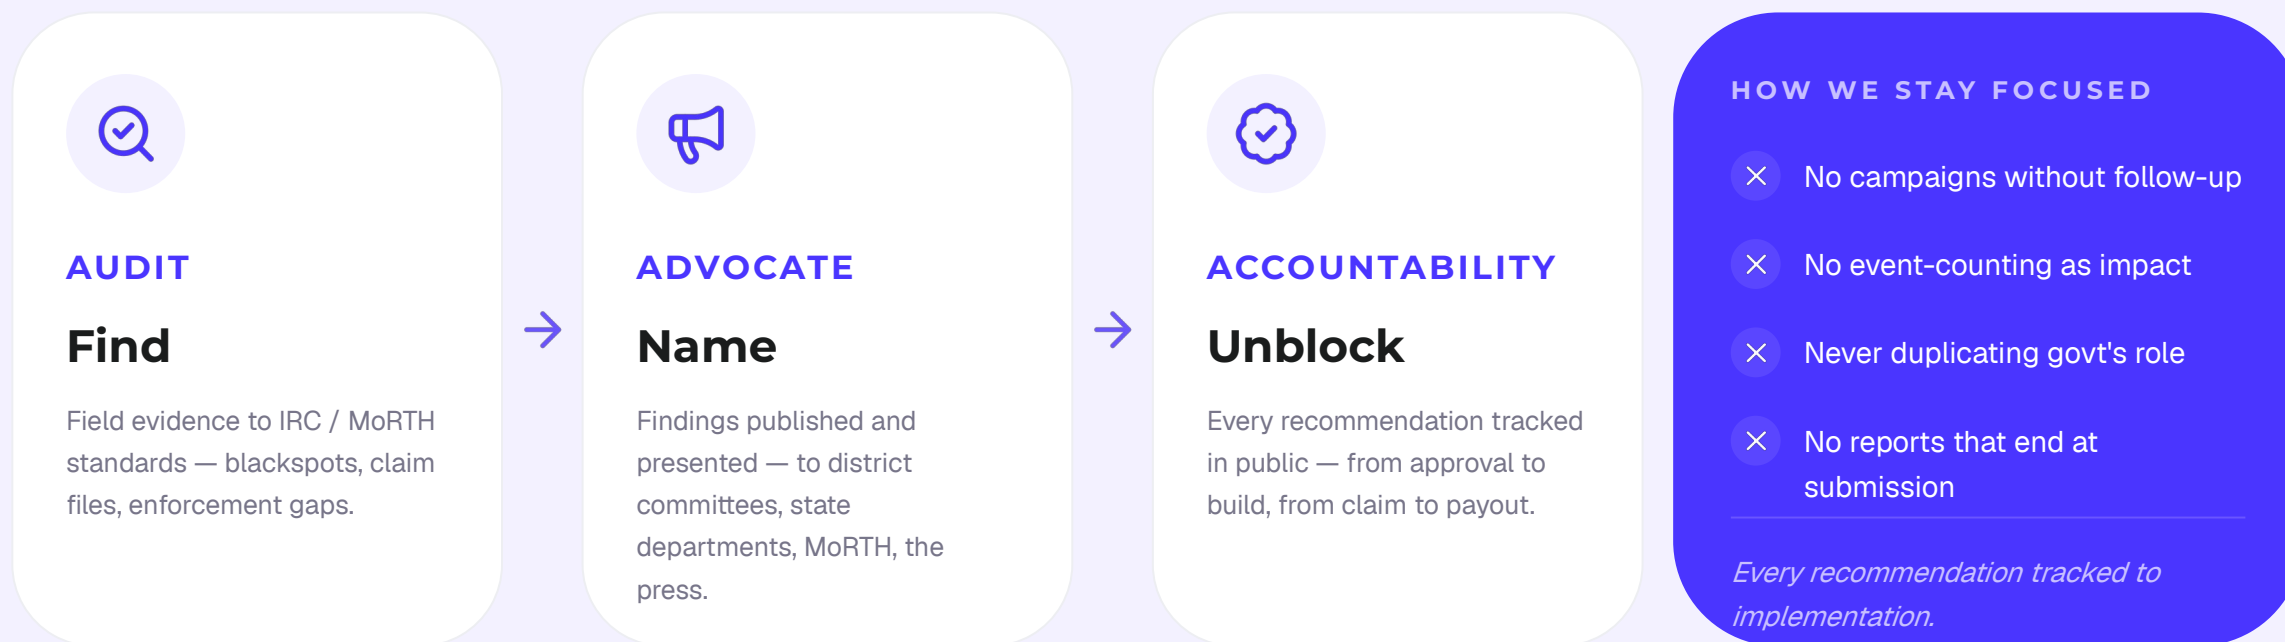

Open data & education

Public dashboards, comics, guides

Trustees: Amar Srivastava (Founder, IRSC) · Deepanshu Gupta (Founder, IRSC) · Gajendra Jangid (Co-founder, Cars24)

Board of Advisors: Piyush Tewari (SaveLIFE Foundation) · Prof. Geetam Tiwari (IIT Delhi)

How we work: audit, advocate, and follow through until the fix is built.

Institutionally embedded: 4 District Road Safety Committees · MoUs with Jaipur Traffic Police & Gurugram Police · formally tasked by SW Delhi DRSC.

Four working pillars, one accountability engine.

Each pillar is explained on the following slides; detailed briefs are in the appendix.

01 · ROAD INFRASTRUCTURE

Project Rakshak

Engineering students audit dangerous roads to official standards; governments approve and build the fixes.

25+ approvals · 15 builds begun

02 · ENFORCEMENT TECHNOLOGY

SATARK & AI billboards

AI reads number plates, checks live records and helps traffic police stop the riskiest vehicles.

₹30 Cr+ dues surfaced · 2 cities live

03 · POLICY & VICTIM SUPPORT

Aasha & compensation reform

Research, victim tools and government partnerships that make legal compensation actually reach families.

100+ victims helped in first 4 days

04 · OPEN DATA & EDUCATION

Public platforms & guides

Self-updating public data tools plus comics and plain-language guides that make problems impossible to ignore.

4 platforms · 36 states covered

Project Rakshak — engineering students audit dangerous roads; governments fix them.

A national programme that mobilises trained student teams to audit high-risk locations to official standards and hand authorities ready-to-build fixes.

WHY THIS

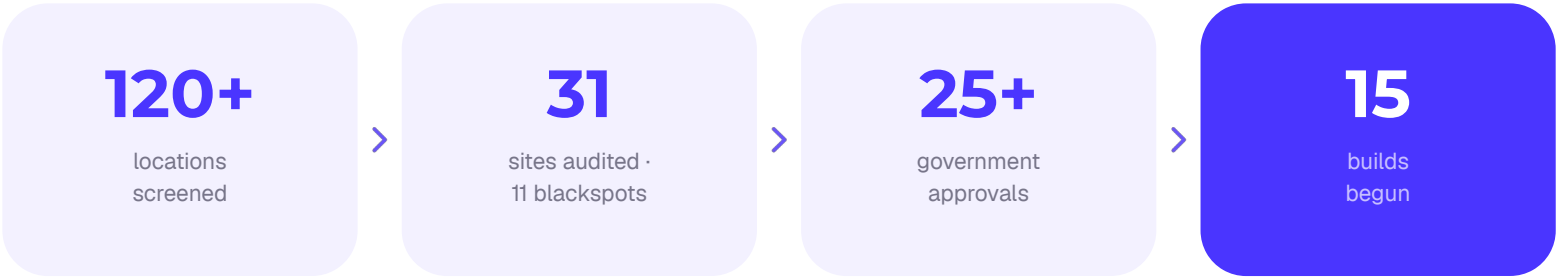

Black spots are known and studied — converting reports into built fixes is the bottleneck we remove.

HOW IT WORKS

Trained student teams audit to IRC / MoRTH standards and hand authorities ready-to-approve proposals.

WHY WE'RE PLACED TO DO IT

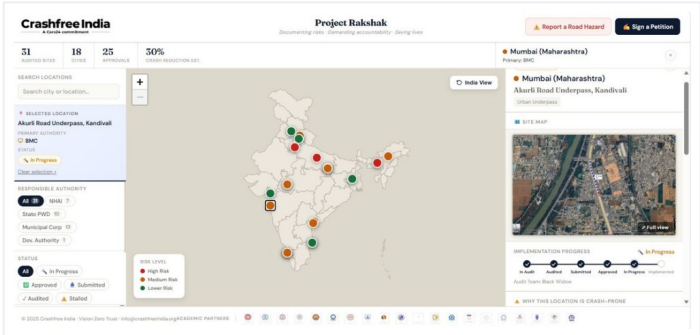

A 9-IIT talent pipeline, mentors led by Prof. Geetam Tiwari (IIT Delhi), and a public tracking dashboard.

18 cities · 20 institutions incl. 9 IITs · 900+ stakeholder surveys · every site public on the dashboard

Institutionalising the model: Cohort 2 runs three tracks — students, NGO partners, CRRI-certified auditors — building towards the Rakshak Audit Manual v1.0, usable by NHAI without rework.

The live implementation dashboard — every site, authority and status public.

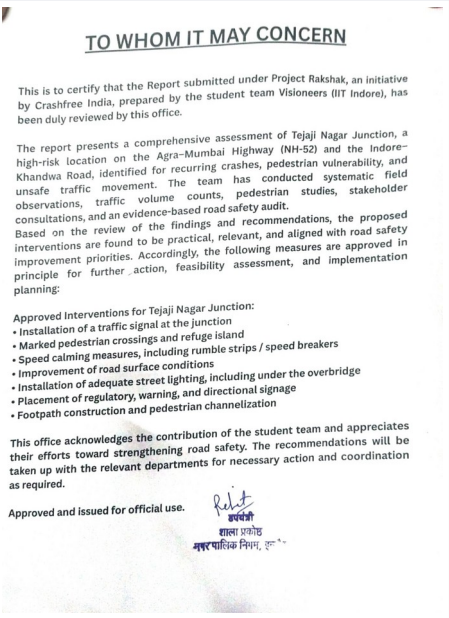

Footpath — Indore

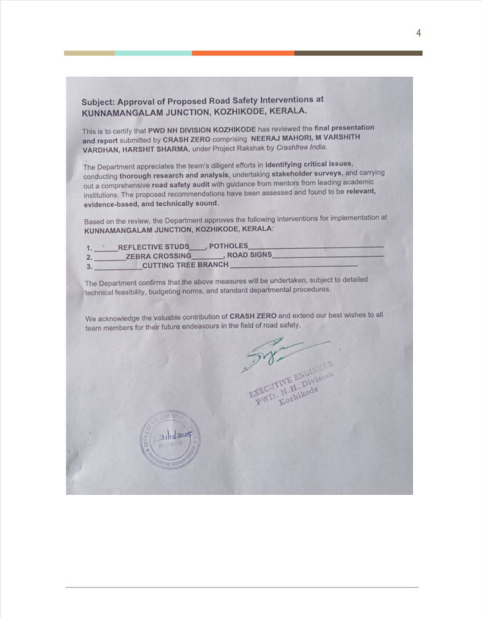

Parking — Durgapur

Government approval, in writing: 25+ signed authority letters and counting.

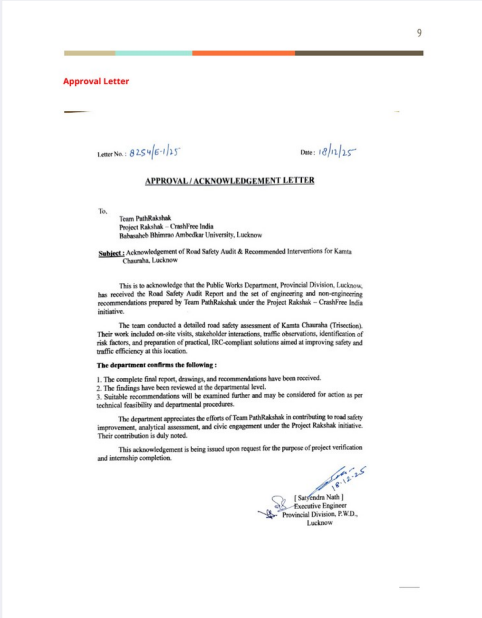

A sample of the approval and acknowledgement letters issued to Rakshak student teams by public works and district authorities.

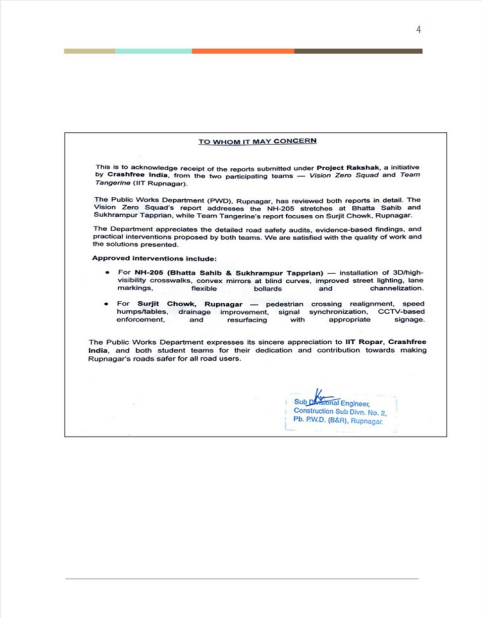

Tejaji Nagar, Indore — approved interventions

Kunnamangalam Jn., Kozhikode — PWD Kerala

Kamta Chauraha, Lucknow — PWD (UP)

NH-205 & Surjit Chowk, Ropar — PWD (Punjab)

Authorities include: PWD Kerala · PWD UP · PWD Punjab · CPWD & Addl. Collector Indore · ADDA Durgapur · R&B Andhra Pradesh · GCC Chennai

SATARK — an AI platform that helps traffic police identify and stop high-risk vehicles.

Cameras read every passing number plate and check it against live national records — officers act on evidence instead of stopping vehicles at random.

3,00,000+
vehicles scanned

₹30 Cr+
pending challans surfaced

350+
high-risk vehicles intercepted

2 cities live
Jaipur & Bengaluru · 5 police approvals

Built with police, not for them — departments set the flagging rules; CFI provides the technology. First 72 hours in Jaipur: 1,240 flagged, 58 intercepted.

Live SATARK billboard, Rambagh Circle, Jaipur — naming a passing vehicle's 4 pending challans in real time.

Helping crash victims and families claim the compensation the law promises them.

10.46 lakh
cases pending

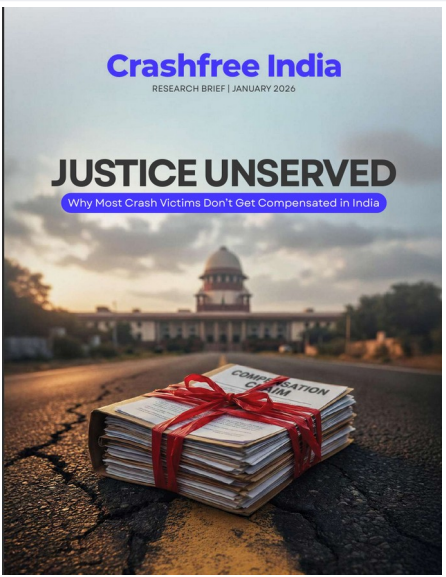

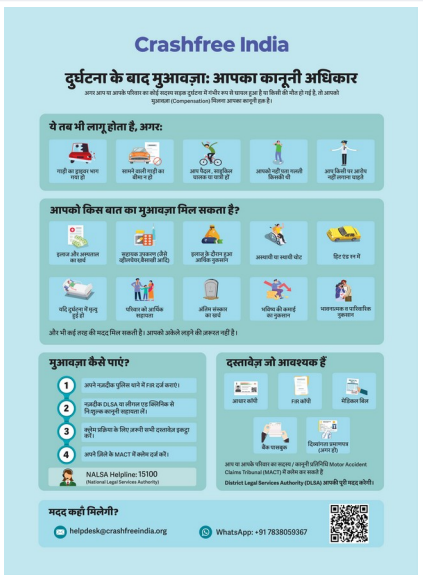

205 vs ~25,000
hit-and-run claims filed vs eligible

3.6 years
average wait

2 of 102
files settled in our Gurugram audit

WHAT WE BUILT AND DO

-  Aasha — India's first 24/7 multilingual AI chatbot guiding victims step-by-step on WhatsApp & voice
-  Free Compensation Calculator based on Supreme Court principles (Sarla Verma, Pranay Sethi)
-  Legal helpdesks in hospital trauma wards — 100+ victims supported in the first 4 days
-  Embedded in 4 District Road Safety Committees — formally tasked by SW Delhi DRSC; fellow placed with Gurugram district offices
-  'Justice Unserved' presented to MoRTH; hit-and-run claim pipeline rebuild underway with Rajasthan Transport Dept.

Hindi legal-rights guide (hospitals & police stations) · 'Justice Unserved' research brief.

Public data tools we built so that road-safety problems cannot be ignored.

Four self-updating platforms — free for government, researchers, journalists and citizens.

National Road Defect Repository

AI reads local news in 13 languages across 146 districts — potholes, missing signage, unlit stretches — mapped publicly.

Supreme Court Litigation Tracker

18 live road-safety cases, 190+ orders, every government deadline tracked — 11 already overdue at launch.

Road Safety in Parliament

All 1,423 parliamentary road-safety questions since 2014, searchable by MP — 282 sitting MPs have never asked one.

National Crash Data Dashboard

Official crash statistics (2019–2024) turned into report cards for 36 states and 50 cities — openly licensed.

Road Safety Resources Hub

Your one-stop destination for comprehensive road safety research, data, policies, and tools. Curated for researchers, policymakers, NGOs, and practitioners working to make roads safer.

WHAT WE DO · OPEN DATA

Citizen hazard-reporting apps — 50+ hazards in first 20 days.

11 / 25

NextMile, campus programmes and street-level education that bring citizens into road safety.

NEXTMILE — NATIONAL ROAD SAFETY POLICY IDEATHON (2025)

-  Grand Finale at India Habitat Centre, Sept 2025 — jury included Justice J.R. Midha and ex-MoRTH leadership.
-  Winning ideas feed CFI's own pipeline — compensation reform and rider safety became live workstreams.
-  Street plays, comics and multilingual guides carry road-safety education beyond campuses.
-  Next: 'Be a Rakshak' university chapters at IITs, NITs and SPAs, with MS Dhoni as the recruiting voice.

NextMile Grand Finale — winners on stage, Sept 2025.

Year one: measurable results across 18 Indian cities.

WORKING ALONGSIDE:

OUR AMBASSADOR

MS Dhoni is Crashfree India's Goodwill Ambassador.

One of India's most trusted public figures joined us in April 2026, unveiled at our national forum at IIT Delhi. His role — lending his voice where it moves people to act:

- ✓ Inviting India's students to join Project Rakshak road audits
- ✓ Championing safer school zones
- ✓ Spreading awareness of victims' compensation rights and Aasha

“Because every ride deserves to end safely.”

Announcement covered by Business Standard · The Tribune · The Wire

CFI shoot · June 2026

Guided by two of India's foremost road-safety experts.

Piyush Tewari

Founder & CEO, SaveLIFE Foundation

- Architect of India's Good Samaritan Law (Supreme Court, 2016)
- Built the Zero Fatality Corridor model — ~40% fewer deaths on Mumbai–Pune Expressway; scaling with MoRTH
- Rolex Award for Enterprise · Elevate Prize · MPA, Harvard

Prof. (Dr.) Geetam Tiwari

Professor Emerita, TRIPC, IIT Delhi

- Three decades leading India's foremost road-safety research centre — a WHO Collaborating Centre
- Global authority on vulnerable road users & safe-system design · PhD, University of Illinois Chicago
- Guides Project Rakshak's audit methodology; anchors our Expert Consortium

+ 75+ part-time road-engineering interns across India

THE YEAR AHEAD

Year two: fewer bets, deeper districts, and more fixes built on the ground.

Every three minutes, a life is lost on an Indian road. Join us in changing that.

YEAR TWO, WITH YOU — THE TARGETS

- 150+ blackspots audited by the national pipeline
- Model districts: Gurugram · SW Delhi · Jaipur
- 12+ district-committee presentations
- Rakshak Audit Manual v1.0 — usable by NHAI without rework

START THE CONVERSATION

-  crashfreeindia.org
-  helpdesk@crashfreeindia.org
-  Live proof: crashfreeindia.org/rakshak/dashboard

Lasting change happens when someone owns the follow-through. That is the job we have taken on.

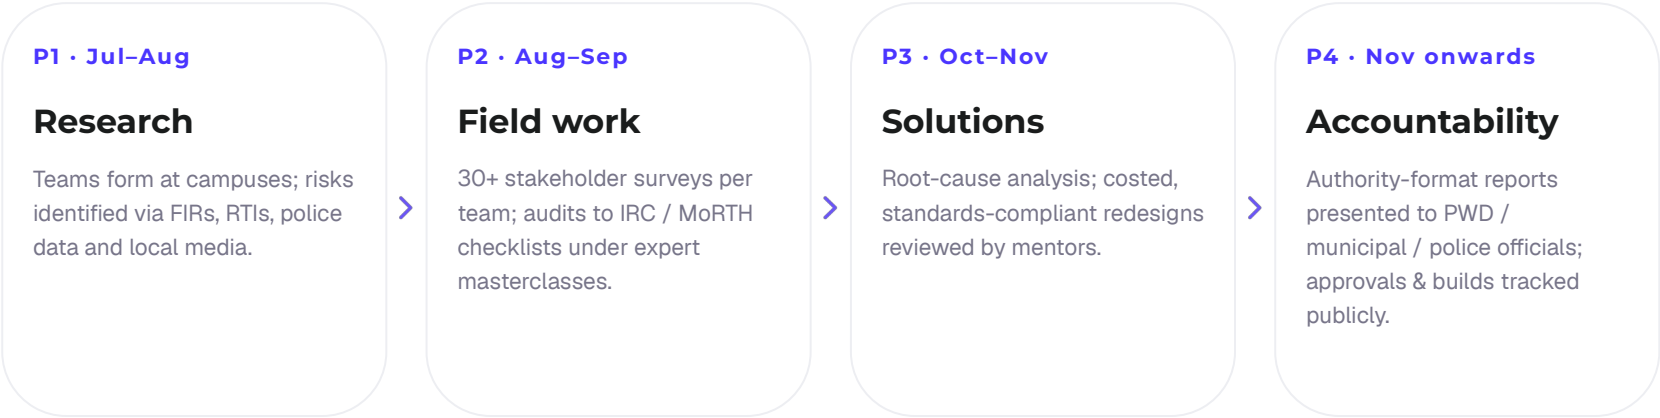

REFERENCE MATERIAL

Appendix: programme deep-dives.

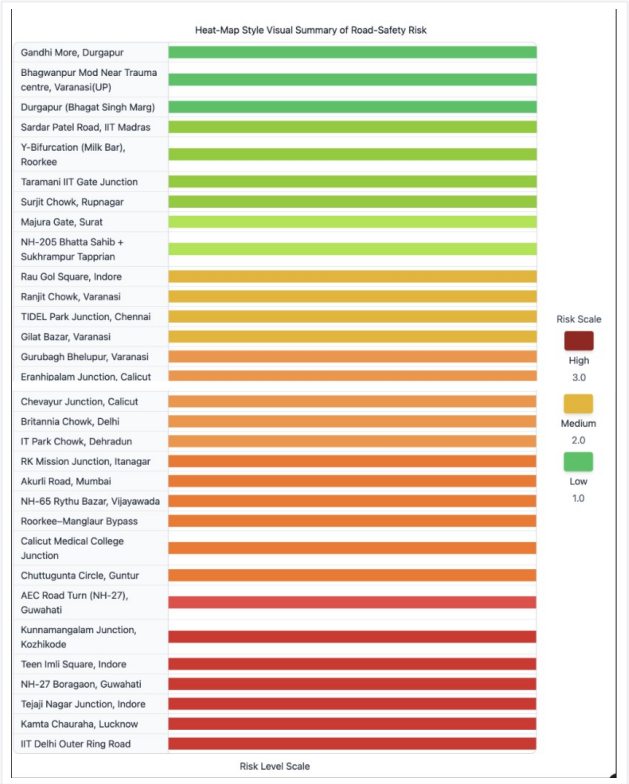

- A1 Project Rakshak — model & Cohort 2
- A2 Rakshak — approvals & site evidence
- A3 SATARK — product & deployment
- A4 'Justice Unserved' — key findings
- A5 Open-data platforms in detail
- A6 NextMile & public education
- A7 Press & contact

The Rakshak model: a four-phase audit pipeline, now scaling into three tracks.

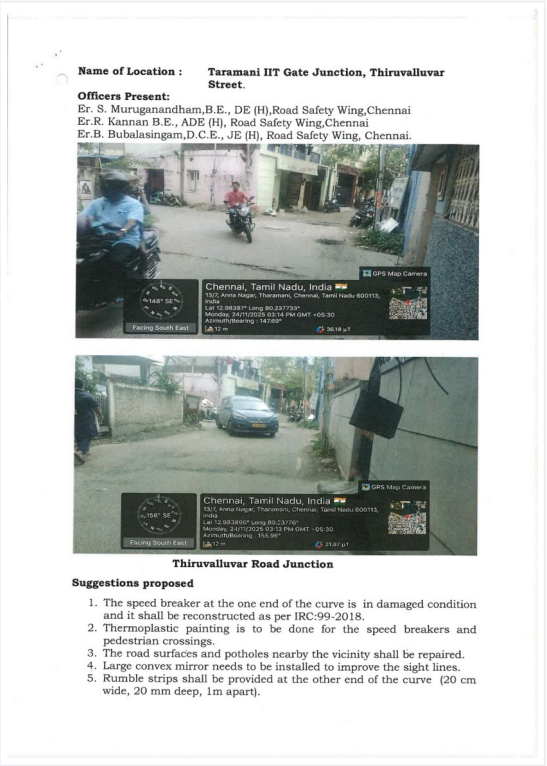

COHORT 2 (2026-27) — THREE TRACKS, ALL [TARGETS]

Institutional	IIT / NIT / SPA student teams — ~90 sites
NGO partners	~20 sites · 100% desk review · 10–15% CFI re-checks
Certified RSAs	CRRI-certified auditors · full IRC SP:88 · 'usable by NHA without rework' · ~40 sites

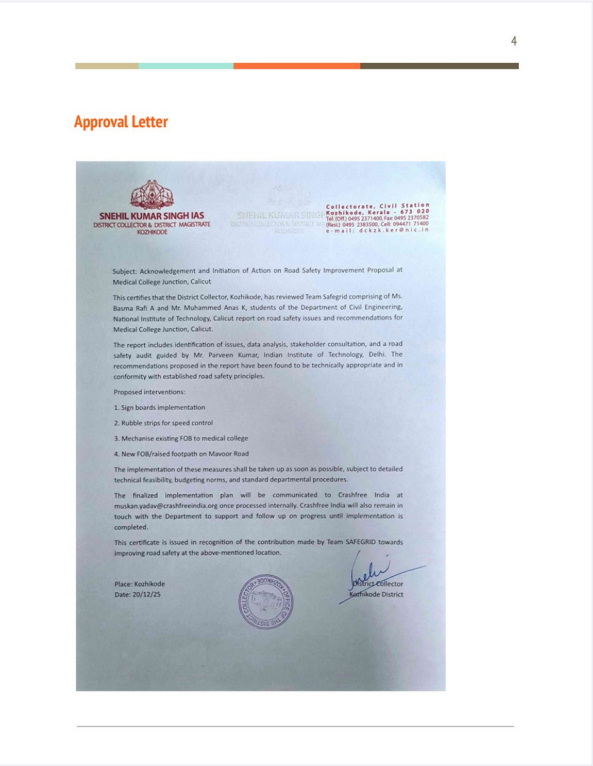

Risk heat-map of the 31 audited corridors.

From site survey to signed approval: what the paper trail looks like.

Chennai: site photos + engineer suggestions (Team Sentinels).

Official acknowledgement on state letterhead (Team Safegrid).

WHAT AUTHORITIES APPROVED (EXAMPLES)

Tejaji Nagar, Indore — signal, refuge island, speed calming, footpaths — CPWD & Addl. Collector

Kamta Chauraha, Lucknow — complete junction redesign package — PWD

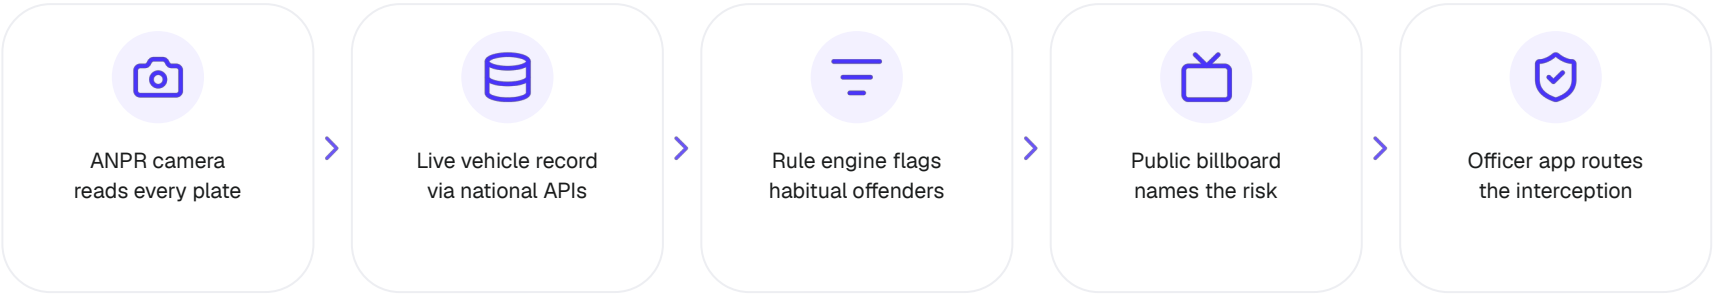

NH-205 / Surjit Chowk, Ropar — high-friction surfacing, signage, crossings — PWD Punjab

Kunnamangalam Jn., Kozhikode — reflective studs, markings, signage — PWD Kerala

Thiruvottiyur Jn., Chennai — speed breakers repaired to IRC spec, thermoplastic paint — GCC

Full set of 25+ letters available in the Rakshak approvals folder.

Inside SATARK: from camera to intercept in under a minute.

DEPLOYMENT

Live: Jaipur (Rambagh Circle billboard, officer app) & Bengaluru (Trinity Circle billboard) · approvals from 5 police forces · upcoming: Gurugram, Pune, Ahmedabad

OFFICER APP

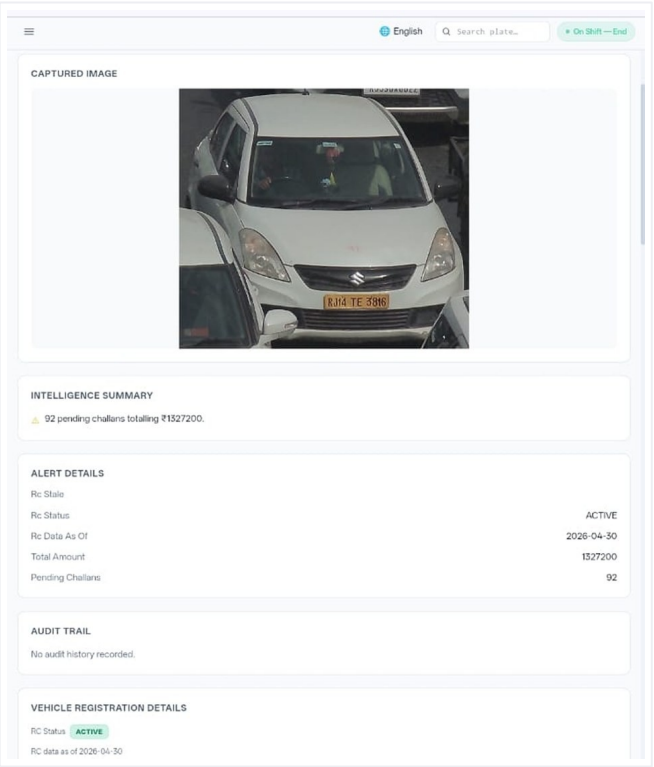

Prioritised vehicle queue · full challan history via national APIs · plain-language intelligence summary · one-tap outcome logging (intercepted / missed / dismissed)

WHY IT MATTERS

46 Cr e-challans issued nationally, ~75% unpaid — SATARK turns that dormant record into live, targeted roadside enforcement

FLAGGING CRITERIA

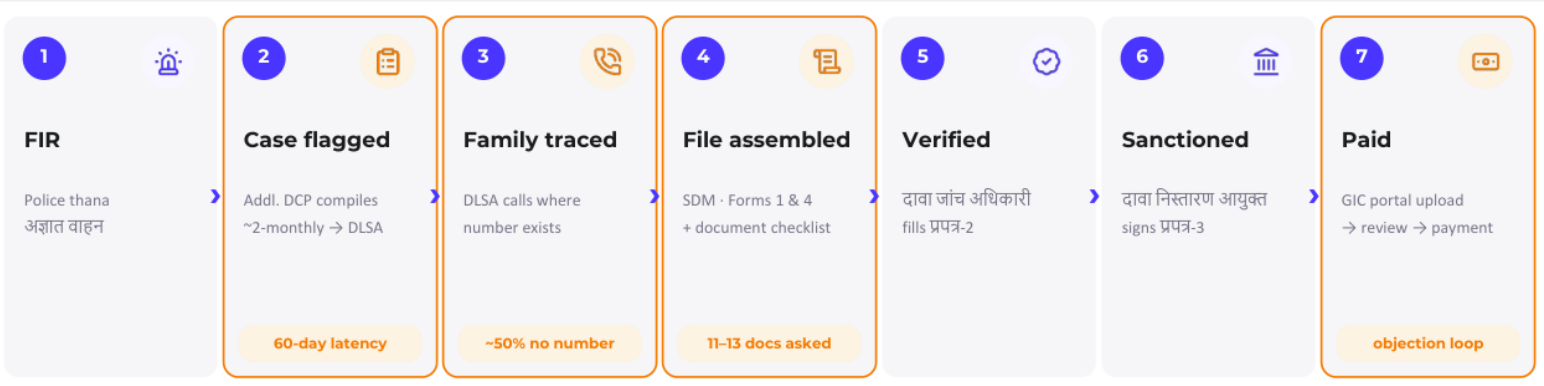

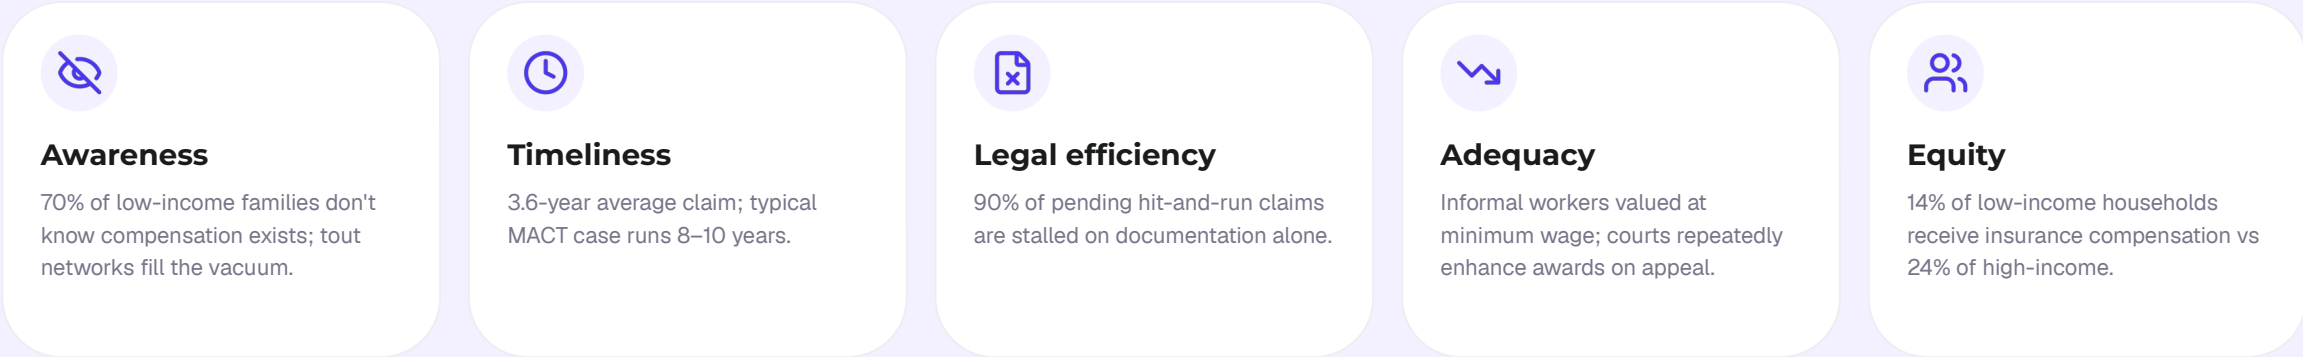

Set by police, not CFI — e.g. 10+ pending challans or ₹10,000+ outstanding · 20,000+ vehicles flagged on these rules so far

The officer app: captured vehicle, live intelligence summary.

'Justice Unserved': why crash compensation fails, in five measured gaps.

Published January 2026; launched at IIT Delhi; findings presented to MoRTH and cited by national press.

205 claims filed vs ~25,000 eligible.
The pipeline, not the scheme, is the gap — so that is what we are fixing, office by office.

The claim journey we mapped in Jaipur — six institutions from FIR to payment; every hand-off manual today.

The data commons, in numbers.

National Road Defect Repository

cfi-defect-repository.vercel.app

AI reads local-language news daily in 13 languages across 146 districts (Bihar, UP, Rajasthan); defects geocoded and clustered into ranked public hotspot maps with verbatim source evidence.

Road Safety in Parliament

road-safety-parliament.vercel.app

1,423 questions across 4 ministries since 2014; find-your-MP report cards; live session tracking; RTI Watch pairs it with CFI's Delhi MACT RTI campaign.

SC Litigation Tracker

sc-litigation-tracker

18 live cases, 190+ orders, 27 precedent judgments; an accountability ledger of Supreme Court directions with auto-flipping deadlines — 11 overdue at launch.

Crash Data Dashboard

cfi-crash-dashboard.vercel.app

MoRTH's 266-page annual reports productised: 2019–2024 data, report cards for 36 states + 50 cities, 21 verified findings, CC-BY open license.

Live crash-data walkthrough at the NextMile finale — the dashboards in use.

All four platforms are self-updating cloud services — nothing depends on any one person's laptop.

NextMile's six policy tracks, and the education assets that travel beyond campuses.

Speed management

Crash-claim compensation reform

Delivery-rider safety

Local blackspot identification

Road-safety data transparency

On-road emergency protocols

- 'Know Your Rights with Aasha' comic**
Three compensation pathways explained in comic form — Hit & Run Scheme (₹2L), Section 164 no-fault (₹5L), Section 166 full claims.
- Hindi crash-claim guides**
4-step claim process, free DLSA legal aid, NALSA 15100, Cashless Treatment Scheme 2025 (₹1.5L / 7 days) — distributed at hospitals and police stations.
- Pre-Hospital Care Primer**
Golden Hour, ERSS-112, ambulance benchmarks — India's emergency-response gaps mapped against global standards.
- Road Safety Dialogue Series**
1,000+ participants across sessions with police, transport departments and professionals.
