

EXPRESSION OF INTEREST · NATIONAL ROAD SAFETY BOARD

Working Group 2: Safe Roads, Speeds & Vulnerable Road Users

Submitted by Crashfree India (Vision Zero Trust) — a technology-led road safety nonprofit backed by Cars24, working with public authorities across 18 cities.

31

sites audited across 18 cities

25+

written authority approvals

15

implementations underway

3,00,000+

vehicles screened by SATARK

A letter to the Working Group

New Delhi · August 2026

Respected Chairperson and Members of Working Group 2,

Crashfree India is a young road safety nonprofit — registered as the Vision Zero Trust, co-founded with the Indian Road Safety Council, and backed by a three-year, US\$3 million commitment from Cars24. We work alongside public authorities: our student teams audit dangerous locations under senior experts, our technology helps police and administrators see their own pipelines, and our support tools stand with families after a crash.

In our first year we audited 31 high-risk locations across 18 cities, secured 25+ written approvals from road-owning authorities, and began implementation at 15 sites — each tracked on a public dashboard. SATARK, our AI enforcement platform, has screened over 3,00,000 vehicles for police in Jaipur and Bengaluru and has now reached Gurugram. Four open-data platforms, the Aasha victim chatbot, hospital helpdesks and MS Dhoni as our Goodwill Ambassador complete the picture.

The pages that follow introduce the organisation briefly, then set out the work most relevant to this Working Group in the detail its mandate deserves. Everything shown is running today, is public, and is offered to the Board without cost. We would be honoured to contribute.

Respectfully,

Akhtar Hussain

Mission Lead, Crashfree India · akhtar@crashfreeindia.org · crashfreeindia.org

Five sections, **three minutes** to skim

1

About Crashfree India

Who we are, how we are set up, and the principles we work by.

04

2

What we have built

Every public-facing programme — audits, enforcement tech, victim support, open data, youth, campaigns.

05 – 11

3

Our people

Trustees, Board of Advisors, and the expert bench behind the work.

12

4

Project Rakshak in depth

The deep dive matched to this Working Group's mandate — evidence, method, and results.

13 – 21

5

How we can contribute

Four concrete, no-cost offers to the Working Group.

22 – 23

Crashfree India: a nonprofit that adds **capacity** to road safety work

Registered as the Vision Zero Trust · Co-founded by Cars24 and the Indian Road Safety Council · Working since June 2025 · New Delhi

- 

Evidence first

Structured field audits, file reviews and research to official standards — not opinion.
- 

Institutional collaboration

We work through PWDs, NHAI, transport departments, police and District Road Safety Committees.
- 

Youth-led capacity

Trained student teams from IITs, NITs and SPAs add the auditing hands the system needs.
- 

Technology for follow-through

Public dashboards track every recommendation from submission to completion.

Where we work today — 18 cities, north to south.

Backed by a US\$3 million, three-year commitment from Cars24 — programmes, not overheads, receive 71% of the budget.

Six lines of work, one connected system

Audits create data · data supports policy · policy guides the field. Everything below is live today.

Project Rakshak

Student-led road audits, fixed with authorities

31 sites · 15 under implementation

SATARK enforcement

AI support that helps police find high-risk vehicles

3,00,000+ vehicles screened

Victim support

Aasha chatbot, calculator, hospital helpdesks

100+ victims helped in first 4 days

Open public data

Four self-updating data platforms, free to use

36 states & 50 cities covered

Youth & policy

NextMile ideathon and national dialogue series

2,000+ participants engaged

Public campaigns

Road Safety Month with police & schools; MS Dhoni

Trustees: Amar Srivastava (President · Founder, IRSC) · Deepanshu Gupta (Managing Trustee) · Gajendra Jangid (Co-founder, Cars24) **Team:** IIT Delhi, NALSAR, TISS & HKUST alumni · 75+ engineering interns · 31 student audit teams

Project Rakshak, in one sentence

Trained student teams, guided by senior road-safety experts, audit dangerous road locations — and Crashfree India walks each recommended fix through the road-owning authority until it is built.

Students audit

Teams from IITs, NITs and SPAs collect data on-site: traffic, conflicts, 900+ stakeholder surveys.

Experts verify

Mentors anchor every audit to IRC codes and MoRTH checklists before anything is proposed.

Authorities build

The fix goes to the PWD, corporation or NHAI in its own format — and we track it to completion.

Four phases each cohort: Research & problem identification → Stakeholder engagement & audits → Analysis & costed solutions → Reporting & authority engagement

Identification has outpaced rectification — **capacity is the constraint**

The knowledge exists; the pipeline that turns identified risk into completed engineering needs more trained hands.

13,795

black spots identified nationally (MoRTH)

5,036

permanently rectified so far (Parliamentary Standing Committee, 2024)

44

certified Road Safety Auditors on the national registry (July 2026)

Low-cost engineering measures — raised crossings, traffic calming, lighting, safer intersections — reduce crashes by 20–80% where applied (iRAP & PIARC evidence). What limits progress is steady, supervised auditing capacity and follow-up, working under the road-owning authority.

Project Rakshak was designed for precisely this constraint: trained auditing capacity that supports road-owning agencies — and tracks every fix to completion.

Guntur, Andhra Pradesh — drainage correction underway after audit.

Cohort 1: a national footprint in the first year

31 student teams · 20 institutions including nine IITs · 900+ stakeholder surveys · guided by 8 mentors and independent evaluators

North: Ropar, Dehradun, Roorkee, Delhi, Lucknow, Varanasi · East: Guwahati, Durgapur · West & Central: Indore, Mumbai, Surat · South: Vijayawada, Guntur, Kozhikode, Chennai — among 18 cities.

Estimated 20–50% crash reduction at treated sites once complete — based on WHO / iRAP evidence for these counter-measures; we will verify with before-and-after data as implementations finish.

Cohort-1 sites across India.

Approvals in writing, from the authorities that own the roads

A sample of the 25+ approval and acknowledgement letters issued by public works and district authorities.

APPROVING AUTHORITIES INCLUDE

PWD Kerala

ADD A Durgapur

PWD Uttar Pradesh

R&B Andhra Pradesh

PWD Punjab

GCC Chennai

CPWD + Addl. Collector, Indore

BMC Mumbai

From approval to construction: **implementations under way**

Parking rationalisation — Durgapur

Road & shoulder work — Durgapur

Fresh markings — Guntur

Barricading — Indore

Footpath construction — Indore

Signage — Mumbai

Case: Tejaji Nagar Junction, Indore — an official black spot; redesign approved by CPWD and the Additional Collector's office.

A public dashboard tracks every site to completion

Live public dashboard — every site, its authority, risk level and implementation stage.

Every site tracked

From submission through approval to completed construction — regardless of who audited it.

The PRAGATI parallel

The PM's PRAGATI platform showed what visible follow-up does for stuck projects. Same principle here, for road safety fixes.

What the Board gains

An honest, live read on how quickly road-owning agencies can act — evidence for capacity planning, not just compliance.

Anchored to the codes **your engineers already use**

IRC codes & MoRTH checklists

Every audit instrument is built on them — nothing bespoke, nothing incompatible.

A line into IRC H-7

Prof. Geetam Tiwari, member of the IRC H-7 Committee on Road Safety Audit, chairs our advisory work.

Masterclasses before fieldwork

Prof. Tiwari on the Safe System approach; Dr. S. Velmurugan (CSIR-CRRI) on IRC-131 and SP-55.

Handover in the authority's format

Findings arrive as the PWD or corporation needs them — ready to action, tracked publicly after.

Mentor and authority engagement is continuous — not a one-time submission.

Built to be institutionalised — not to depend on us

Three audit tracks matched to road types, and a role for CFI that narrows over time.

Track A — Institutional	Track B — NGO partners	Track C — Certified RSAs
IIT / NIT / SPA teams under expert mentors	Field teams; desk-reviewed and re-verified by CFI	CSIR-CRRI-certified auditors, full IRC SP-88
Urban arterials, in-town state highways, district roads	District & peri-urban corridors	National highways, complex junctions

Today	CFI runs cohorts, quality-controls audits and stewards the public portal.
Next	Rakshak Audit Manual v1.0 codifies the method; universities field their own teams; NGOs run Track B directly.
Mature	States engage certified RSAs for Track C without CFI as intermediary; the portal remains the shared public record.

A growing evidence base on **those most at risk**

Gig & delivery riders

'When Risks Become Routine' (Feb 2026): incentive pressure, helmet compliance and training gaps — 300+ rider study, Delhi NCR.

Pedestrian-first audits

Rakshak audits document crossings, footpaths and lighting as designable protections — 900+ stakeholders consulted.

School zones

College-led, standards-based school-zone screening under exploration as the next extension of the audit platform.

Enforcement that protects VRUs

SATARK helps police prioritise the small share of vehicles with the worst records — targeted, fair, technology-led.

Delivery-rider outreach — materials and rights briefings at shift points.

Four concrete offers to **Working Group 2**

All four are ready today, need no funding from the Board, and can begin within weeks.

1

Ready evidence for standard-setting

Site-level audit data, crash-pattern analysis and costed intervention designs across emerging hotspots and official black spots — for rectification protocols and speed-management guidance.

2

A live testing ground

Active district relationships in Gurugram, South-West Delhi and Jaipur offer a ready pipeline to pilot or stress-test draft recommendations before national rollout.

3

Ground-level implementation diagnostics

Granular, field-verified insight into how DRSCs and road-owning agencies actually move — meeting cadence, data use, follow-through.

4

Technical bench strength on request

Our academic and expert network stands ready for drafting, review and technical input on road design, speed and VRU standards.

We would be honoured to contribute to Working Group 2.

Our evidence, our district relationships, our technology and our expert bench are available to the Board — in whichever form is most useful.
