# Working Group 5: Post-Crash Care, Policy Standards & State Implementation

Submitted by Crashfree India (Vision Zero Trust) — a technology-led road safety nonprofit backed by Cars24, working with public authorities across 18 cities.

4

District Road Safety Committees joined

102

hit-and-run files reviewed with districts

100+

victims helped in helpdesks' first 4 days

~46%

of Rajasthan's monthly claims mapped in Jaipur

Submitted to the Chairperson and Members, Working Group 5, National Road Safety Board

[crashfreeindia.org](https://crashfreeindia.org)

# A letter to the Working Group

New Delhi · August 2026

Respected Chairperson and Members of Working Group 5,

Crashfree India is a young road safety nonprofit — registered as the Vision Zero Trust, co-founded with the Indian Road Safety Council, and backed by a three-year, US\$3 million commitment from Cars24. We work alongside public authorities: our student teams audit dangerous locations under senior experts, our technology helps police and administrators see their own pipelines, and our support tools stand with families after a crash.

Our post-crash work began with evidence. 'Justice Unserved', our study of the hit-and-run compensation pipeline, found only 205 claims filed in FY22-23 against roughly 25,000 eligible crashes. Since then we have joined four District Road Safety Committees, reviewed 102 case files with the Gurugram administration, mapped Rajasthan's scheme office-by-office with the Transport Department, and built the tools families actually use — the Aasha chatbot, a compensation calculator, hospital helpdesks that supported 100+ victims in their first four days, and plain-language guides in Hindi.

The pages that follow introduce the organisation briefly, then set out the work most relevant to this Working Group in the detail its mandate deserves. Everything shown is running today, is public, and is offered to the Board without cost. We would be honoured to contribute.

Respectfully,

**Akhtar Hussain**

Mission Lead, Crashfree India · [akhtar@crashfreeindia.org](mailto:akhtar@crashfreeindia.org) · [crashfreeindia.org](https://crashfreeindia.org)

## Five sections, **three minutes** to skim

1

### About Crashfree India

Who we are, how we are set up, and the principles we work by.

04

2

### What we have built

Every public-facing programme — audits, enforcement tech, victim support, open data, youth, campaigns.

05 – 11

3

### Our people

Trustees, Board of Advisors, and the expert bench behind the work.

12

4

### Post-crash care in depth

The deep dive matched to this Working Group's mandate — evidence, method, and results.

13 – 21

5

### How we can contribute

Four concrete, no-cost offers to the Working Group.

22 – 23

# Crashfree India: a nonprofit that adds **capacity** to road safety work

Registered as the Vision Zero Trust · Co-founded by Cars24 and the Indian Road Safety Council · Working since June 2025 · New Delhi

## Evidence first

Structured field audits, file reviews and research to official standards — not opinion.

## Institutional collaboration

We work through PWDs, NHAI, transport departments, police and District Road Safety Committees.

## Youth-led capacity

Trained student teams from IITs, NITs and SPAs add the auditing hands the system needs.

## Technology for follow-through

Public dashboards track every recommendation from submission to completion.

**Backed by a US\$3 million, three-year commitment from Cars24** — programmes, not overheads, receive 71% of the budget.

Where we work today — 18 cities, north to south.

# Six lines of work, one connected system

Audits create data · data supports policy · policy guides the field. Everything below is live today.

## Project Rakshak

Student-led road audits, fixed with authorities

31 sites · 15 under implementation

## SATARK enforcement

AI support that helps police find high-risk vehicles

3,00,000+ vehicles screened

## Victim support

Aasha chatbot, calculator, hospital helpdesks

100+ victims helped in first 4 days

## Open public data

Four self-updating data platforms, free to use

36 states & 50 cities covered

## Youth & policy

NextMile ideathon and national dialogue series

2,000+ participants engaged

## Public campaigns

Road Safety Month with police & schools; MS Dhoni

1M+ citizens reached

# SATARK: AI that helps police stop the right vehicle

Built with Cars24 engineers. Reads number plates, checks government records, and alerts officers to repeat offenders — in real time.

Rambagh Circle, Jaipur — live plate, pending challans and dues on a public billboard.

Officer view — pending challans, RC & compliance status.

3,00,000+

vehicles screened

₹30 Cr+

pending challan value identified

350+

high-risk vehicles intercepted

70,019

vehicles found with pending challans

LIVE · Jaipur & Bengaluru

NEW · Gurugram

Bengaluru's Trinity Circle billboard was India's first — covered by Deccan Herald and national press. Pune and Ahmedabad are next.

# Public data platforms any authority can use, free

Built and maintained by our team; self-updating; no login, no fee. Shown live below.

LITIGATION TRACKER · SUPREME COURT OF INDIA

## Road safety in the Supreme Court of India.

Every systemic road-safety case before the Supreme Court — public interest litigation, suo motu matters and appeals that produced nationwide directions — tracked order by order, alongside the judgments that set precedent for crash victims.

## A family meets **many institutions** — not one programme

We mapped the hit-and-run claim journey with officials in Jaipur — seven stages, six hand-offs, every one manual today.

The claim journey as it actually runs — FIR to payment. Source: CFI mapping with district officials, Jaipur.

**Our work:** make each hand-off visible, guide the family at every stage, and give administrators the dashboards to see where files wait.

# 'Justice Unserved' — the evidence base we built first

Published January 2026 · launched at IIT Delhi · findings presented to MoRTH · covered by national press.

The report — file reviews, RTIs and consultations across the pipeline.

**Press:** Deccan Herald · Economic Times · Fortune India · IndiaSpend · Scroll.in · The Wire — and cited in Parliament-facing briefings.

## Awareness

70% of low-income families are unaware compensation exists.

## Timeliness

3.6-year average claim; MACT cases often run 8–10 years.

## Documentation

90% of pending hit-and-run claims stall on documents alone.

## Adequacy

Informal workers are often valued at minimum wage in courts.

## Equity

14% of low-income households compensated vs 24% of high-income.

# 205

hit-and-run claims filed in FY22-23...

against ~**25,000** eligible crashes.

*The scheme is sound — the pipeline to it needs support.*

# Working inside the district machinery

Not commentary from outside — formal seats, formal tasking, files on the table.

- 

**Four DRSCs joined**

Gurugram, South-West Delhi, North-West Delhi and Jaipur — with MoUs with Jaipur Traffic Police and Gurugram Police.
- 

**102 files, read page by page**

With Gurugram's administration we reviewed every hit-and-run file since 2022 — mapping exactly where eligible families drop out.
- 

**Formally tasked**

The South-West Delhi DRSC's signed minutes task Crashfree India with digitisation and analytics support for scheme files.
- 

**Embedded presence**

A research fellow sits with Gurugram district offices — implementation support, not external commentary.

Legal-rights helpdesk with district administration, Jan 2026.

Law-student volunteers after a hospital helpdesk drive.

# With Rajasthan: from ground mapping to a working template

Supporting the State Road Safety Lead Agency and Transport Department on the Hit-and-Run Compensation Scheme.

~180

of ~395 monthly hit-and-run claims in Rajasthan come from Jaipur alone (~46%)

Not because crashes happen only there — because Jaipur runs active outreach and a single coordination cell. The template is replicable.

## What holds claims back

11–13 documents demanded vs the 7 court-agreed standard · ~50% of files lack a usable family phone number · manual hand-offs between six offices.

## The cautionary example

A state portal that changed how offices work saw monthly requests fall 350 → 25. Our design rule: no stakeholder changes their medium.

## Five GIC queries drafted

Clarification questions ready for the insurer consortium — a joint ask from the Department lands harder.

## Six asks → 60 days

Decisions identified with the Department that put Phase 1 (family traceability) in motion within 60 days.

# Designed so no stakeholder changes how they work

Families stay on WhatsApp; officers keep their queues and sign-offs; the system connects them behind the scenes.

## The claimant-side standards **WG-5** could set

Small, procedural standards — none needing new legislation — each drawn from files we have read and offices we work with.

### THE 7-DOCUMENT STANDARD — AS AGREED BEFORE THE SUPREME COURT

- ✓ Application (Form I & IV)
- ✓ Copy of FIR / FAR
- ✓ Post-mortem or injury report
- ✓ Death certificate (in death cases)
- ✓ Claimant / victim ID proof
- ✓ Bank passbook (IFSC visible)
- ✓ Cashless-treatment amount received

### ASKED ON TOP TODAY — EACH ONE A TRIP, A FEE, OR A DROP-OUT

- + Court-certified copies of FIR & FR
- + Full challan file / e-DAR / iRAD
- + Site map / naksha mauka
- + Notarised affidavit — name mismatch
- + Notarised affidavit — non-filing of MACT claim
- + Legal-heir / succession certificate

**Also ready:** stage-wise SLA benchmarks · family-communication norms at every state change · a document-quality checklist for AI-assisted pre-verification.

# Helpdesks in trauma wards, and an EMS evidence line

Hospital legal helpdesk — 100+ victims supported in the first four days of operation.

## The response gap, measured

Our Pre-Hospital Care Primer (Sept 2025): ERSS-112 is live across 36 states & UTs, yet ambulance arrival averages 25–35 minutes and the full care episode runs 55–75 minutes — against a 60-minute golden hour.

## State innovations documented

Maharashtra's MEMS — 937 ambulances under centralised dispatch; Tamil Nadu's TAEI trauma corridors — pre-arrival alerts and treatment protocols.

## Good Samaritan & Cashless 2025

Bystander protections and the ₹1.5 lakh / 7-day Cashless Treatment Scheme, explained in our public guides — the demand side of trauma care.

## Where this serves WG-5

A ready, referenced baseline for the Group's EMS and trauma-care standards discussions — with state models already compared.

# Numbers a standard can act on

Each one is a lever for a WG-5 standard, toolkit entry or communication norm — none requires new legislation.

921 of 1,026

claims pending nationally were stalled at documentation alone (July 2024)

~60 days

typical intake latency where claims surface only via bi-monthly meetings

~50%

of case files lack a usable family phone number — traceability is the first lever

7 vs 11–13

court-agreed documents vs what claimants are asked for in practice

FY23-24: 12%

of eligible crashes converted to filed claims — improving, from a 2% base

5 + 22

GIC clarification queries drafted · RTIs building the public record

**The claim's other side:** consultations with GIC and insurers on settlement practice · guidance from Justice J.R. Midha (Retd.), architect of the FaSTDAR process · working partners across MACT courts, DLSAs and legal-services clinics.

# Post-crash care needs more than one discipline

A legally sound framework can still be hard to use; a good portal can still miss district workflows. Our team is built across the whole chain.

## Law & policy

NALSAR and Delhi University-trained; scheme analysis, RTIs, MoRTH and Parliament-facing engagement.

## Technology & product

IIT-trained; Aasha, the calculator, dashboards and the portal architecture shown earlier.

## Field & district practice

TISS-trained; district embedding, DRSC work, helpdesk operations, victim interviews.

## Behaviour & communication

Psychology and design; guides, comics and multilingual communication families actually read.

**Advised by** Piyush Tewari (SaveLIFE Foundation), Prof. Geetam Tiwari (IIT Delhi) and Justice J.R. Midha (Retd., Delhi High Court) — with practitioner partners across MACT courts, DLSAs and insurers.

## Four concrete offers to **Working Group 5**

All four are ready today, need no funding from the Board, and can begin within weeks.

1

### **A victim-side evidence base**

'Justice Unserved', 120+ victim and family interactions, and file-level audit data showing precisely where eligible families drop out of the process.

2

### **A district toolkit, drawn from practice**

Working DRSC integration experience — agendas, file digitisation, fellow placement — ready to be codified into the Group's district toolkit.

3

### **A reusable state portal blueprint**

The Rajasthan case-management design — guided filing, stage-wise visibility, single-pass clarification — offered as a template any state can adapt.

4

### **Standards input from the claimant's side**

Document standards (the court-agreed 7), communication standards and timeline benchmarks, grounded in what families actually experience.

# We would be honoured to contribute to Working Group 5.

Our evidence, our district relationships, our technology and our expert bench are available to the Board — in whichever form is most useful.
