

CRASHFREE INDIA · A CARS24 COMMITMENT

Systems work because we hold them accountable.

Who we are, what we do, and what we have built — a nonprofit working for zero road deaths in India by 2040.

Partner overview · July 2026 · crashfreeindia.org

I THE PROBLEM

II WHO WE ARE

III WHAT WE DO

IV OUR PEOPLE

MS DHONI · GOODWILL AMBASSADOR

Most road deaths in India are failures of roads and systems — not just of drivers.

59%

of road deaths in India involve no traffic violation by the victim at all.

Ministry of Road Transport & Highways data

Crash records went digital

e-DAR and digitised FIRs make every death traceable to a place, a road design, a file.

Vehicles became identifiable

ANPR cameras and live national vehicle APIs surface repeat offenders instantly.

Failure became attributable

Open data ties deaths to specific junctions, specific processes, specific desks.

India has strong road-safety laws. What has been missing is an institution that makes them work on the ground.

485

people are killed on Indian roads every single day.

ONE DEATH EVERY 3 MINUTES

1,77,175

killed in 2024

66%

aged 18–34

1% → 11%

of world's vehicles → of its road deaths

THE PROBLEM · THREE GAPS

Where the system fails today.

We studied how India responds to a road death. Three gaps repeat everywhere — and no institution owns the follow-through.

GAP 1 · DANGEROUS ROADS

Audits stop at the report.

Hazards get reported and studies get filed — but no institution tracks whether a single fix is ever built.

GAP 2 · COMPENSATION

₹80,000 Cr sits undelivered.

10.46 lakh compensation cases pending. In one Gurugram audit: 102 hit-and-run files since 2022 — only 2 settled.

GAP 3 · ENFORCEMENT

Repeat offenders go unchecked.

46 crore e-challans issued, ~75% unpaid — while roadside enforcement still stops vehicles at random.

The distance between what is known and what gets done is the gap Crashfree India was created to close.

A nonprofit institution working towards zero road deaths in India by 2040.

Launched in June 2025 and funded by Cars24, we identify road-safety failures, get fixes approved by government, and track every fix to completion.

Founded June 2025

Launched by Cars24 with the Indian Road Safety Campaign; roots in a decade of IRSC campus audit work.

\$3M over 3 years

Cars24's committed institutional funding — programme-first: 71% of FY26-27 budget goes to programmes.

Vision Zero Trust

Registered public trust; trustees include Cars24 co-founder Gajendra Jangid.

One north star

Zero road fatalities in India by 2040 — pursued as system repair, not sensitisation.

18 cities and counting

Programmes live across India — Delhi NCR, Jaipur, Indore, Bengaluru, Chennai, Guwahati and more.

MS Dhoni

Goodwill Ambassador since April 2026 — lending India's most trusted voice to the cause.

How we work: audit, advocate, and follow through until the fix is built.

Institutionally embedded: 4 District Road Safety Committees · MoUs with Jaipur Traffic Police & Gurugram Police · formally tasked by SW Delhi DRSC.

SATARK — an AI platform that helps traffic police identify and stop high-risk vehicles.

Cameras read every passing number plate and check it against live national records, so officers act on evidence instead of stopping vehicles at random.

3,00,000+
vehicles scanned

₹30 Cr+
pending challans surfaced

350+
high-risk vehicles intercepted

2 cities live
Jaipur & Bengaluru · 5 police approvals

First 72 hours in Jaipur: 1,240 vehicles flagged, 58 intercepted. · 100 AI challan billboards already live in Gurugram; 12+ cities in discussion.

Helping crash victims and families claim the compensation the law promises them.

THE GAP WE DOCUMENTED

10.46 lakh	compensation cases pending nationwide — ₹80,000 Cr stuck
205 vs ~25,000	hit-and-run claims actually filed vs. eligible crashes (FY22-23)
3.6 years	average wait for a claim — with 20–40 office visits
2 of 102	hit-and-run files settled since 2022 in our Gurugram audit

THE MACHINERY WE BUILT

-  Aasha — India's first 24/7 multilingual AI chatbot guiding victims step-by-step, on WhatsApp and voice
-  Free Compensation Calculator based on Supreme Court principles (Sarla Verma, Pranay Sethi)
-  Legal helpdesks inside hospital trauma wards — 100+ victims supported in the first 4 days
-  Plain-language comic books and Hindi guides explaining rights, schemes and the claim process
-  'Justice Unserved' research presented to MoRTH; claim pipeline being rebuilt with Rajasthan Transport Dept.

'Justice Unserved' (launched at IIT Delhi, 2026) is now the reference dataset on why crash compensation fails in India.

Public data tools we built so that road-safety problems cannot be ignored.

Four self-updating platforms — free for government, researchers, journalists and citizens.

National Road Defect Repository

AI reads local news in 13 languages across 146 districts — potholes, missing signage, unlit stretches — mapped publicly so authorities can act.

Road Safety in Parliament

Every parliamentary road-safety question since 2014 — 1,423 of them — searchable by MP and state. 282 sitting Lok Sabha MPs have never asked one.

Supreme Court Litigation Tracker

18 live road-safety cases and 190+ orders, with each government deadline tracked — 11 were already overdue at launch.

National Crash Data Dashboard

Government crash statistics (2019–2024) turned into report cards for 36 states and 50 cities — free and openly licensed.

Year one: measurable results

across 18 Indian cities.

Every figure above is from our public dashboard and quarterly updates — audited numbers, not estimates.

OUR AMBASSADOR

MS Dhoni is Crashfree India's Goodwill Ambassador.

One of India's most trusted public figures joined us in April 2026, unveiled at our national forum at IIT Delhi. His role — lending his voice where it moves people to act:

- ✓ Inviting India's students to join Project Rakshak road audits
- ✓ Championing safer school zones
- ✓ Spreading awareness of victims' compensation rights and Aasha

“Because every ride deserves to end safely.”

Announcement covered by Business Standard · The Tribune · The Wire

CFI shoot · June 2026

Guided by two of India's foremost road-safety experts.

Piyush Tewari

Founder & CEO, SaveLIFE Foundation

- Architect of India's Good Samaritan Law (Supreme Court, 2016)
- Built the Zero Fatality Corridor model — ~40% fewer deaths on Mumbai–Pune Expressway; now scaling with MoRTH
- Rolex Award for Enterprise · Elevate Prize · MPA, Harvard

Prof. (Dr.) Geetam Tiwari

Professor Emerita, TRIPC, IIT Delhi

- Three decades leading India's foremost road-safety research centre — a WHO Collaborating Centre
- Global authority on vulnerable road users & safe-system design · PhD, University of Illinois Chicago
- Guides Project Rakshak's audit methodology; anchors our Expert Consortium

THE EXPERT BENCH BEHIND OUR AUDITS

Justice J. R. Midha (Retd.)

Delhi High Court · FastDAR architect

Akhilesh Srivastava

IRF India

B. N. Puri

Transport economist

Dr. S. Velmurugan

Head, Traffic Engg. & Safety, CSIR-CRRI

Col. Sanjeev Sharma

CoERS, IIT Madras

Dr. P. K. Sikdar

Ex-Director, CRRI

Dr. Richa Ahuja

IIT Kharagpur · Rakshak advisor

Sarika Panda Bhatt

Raahgiri Foundation

A. M. Rao

Traffic engineering

A full-time team of eight, three trustees, and 75+ engineering interns nationwide.

TRUSTEES · VISION ZERO TRUST

Amar Srivastava
President

Founder, Indian Road Safety Council — 50,000+ volunteers · Diana Award 2019

Deepanshu Gupta
Managing Trustee

Founder, IRSC · Global Youth Coalition for Road Safety leadership board

Gajendra Jangid
General Secretary

Co-founder, Cars24 · ex-Schlumberger

THE YEAR AHEAD

Year two: fewer bets, deeper districts, and more fixes built on the ground.

Every three minutes, a life is lost on an Indian road. Join us in changing that.

YEAR TWO, WITH YOU — THE TARGETS

- 150+ blackspots audited by the national pipeline
- Model districts: Gurugram · SW Delhi · Jaipur
- 12+ district-committee presentations
- Rakshak Audit Manual v1.0 — usable by NHAI without rework
