Crashfree India

Application to Working Group 5: Post-Crash Care, Policy Standards & State Implementation

Tools families actually use: Aasha on WhatsApp, calculator, hospital helpdesks

Published policy research: Justice Unserved and the Pre-Hospital Care Primer

Hand in hand with authorities: 4 district committees, Rajasthan, police MoUs

A letter to the Working Group

New Delhi · August 2026

Respected Chairperson and Members of Working Group 5,

Crashfree India is a young road safety nonprofit, registered as the Vision Zero Trust, co-founded with the Indian Road Safety Council, and backed by a three-year, US\$3 million commitment from Cars24. We work alongside public authorities: our student teams audit dangerous locations under senior experts, our technology helps police and administrators see their own pipelines, and our support tools stand with families after a crash. MS Dhoni carries this message to the country as our Goodwill Ambassador.

Our post-crash work began with evidence. 'Justice Unserved', our study of the hit-and-run compensation pipeline, showed how few eligible families ever receive what the law promises, and our follow-up brief, 'Deposited But Not Delivered', found ~₹986 crore of already-awarded compensation sitting unclaimed in just five cities. Since then we have joined four District Road Safety Committees, mapped Rajasthan's scheme office-by-office with the Transport Department, and built the tools families actually use, the Aasha chatbot, a compensation calculator, hospital helpdesks that supported 100+ victims in their first four days, and plain-language guides in Hindi.

The pages that follow introduce the organisation briefly, then set out the work most relevant to this Working Group in the detail its mandate deserves. Everything shown is running today, is public, and is offered to the Board without cost. We would be honoured to contribute.

Respectfully,

Akhtar Hussain

Mission Lead, Crashfree India · akhtar@crashfreeindia.org · crashfreeindia.org

Five sections, from who we are to what we offer

1

About us, and how we work

Who we are, our approach to the road crash crisis, and why this Working Group.

04 – 06

2

What we have built

Every public-facing programme, audits, enforcement tech, victim support, open data, youth, campaigns.

07 – 14

3

Our people

The team, its capabilities, and the expert bench around the work.

15 – 16

4

Post-crash care in depth

The deep dive matched to this Working Group's mandate, evidence, method, results.

17 – 24

5

How we can contribute

Four concrete, no-cost offers to the Working Group.

25 – 26

Crashfree India: a nonprofit that adds **capacity** to road safety work

Registered as the Vision Zero Trust · Co-founded by Cars24 and the Indian Road Safety Council · Working since June 2025 · New Delhi

- 

Evidence first

Structured field audits, file reviews and research to official standards, not opinion.
- 

Institutional collaboration

We work through PWDs, NHAI, transport departments, police and District Road Safety Committees.
- 

Youth-led capacity

Trained student teams from IITs, NITs and SPAs add the auditing hands the system needs.
- 

Technology for follow-through

Public dashboards track every recommendation from submission to completion.

Where we work today, 18 cities, north to south.

Everything in this deck serves the Group's agenda: faster compensation, stronger EMS evidence, and support victims can actually use.

Our approach: work **with the system**, and prove it with data

Four steps, applied to every problem we take up, from a dangerous junction to a stalled compensation claim.

We do not replace the system and we do not campaign against it. We add hands, evidence and tools to work the system has already committed to.

Why Working Group 5, and what we bring to it

The Group's mandate matches the deepest part of our portfolio. Three focus areas where we are ready on day one.

Clearing the compensation pipeline

Pendency is measured in years and thousands of crores. Our district work shows exactly where files stall, and how visibility clears them.

Victim-facing standards & tools

Aasha, the calculator, guides and helpdesks, working models for the citizen-facing standards WG-5 will set.

EMS & trauma-care evidence

The Pre-Hospital Care Primer benchmarks ERSS-112 and documents state innovations, a ready baseline for care standards.

Compensation pendency, in numbers

Families and courts both lose to process friction. This is a pipeline problem, and pipelines can be fixed with standards and visibility.

₹80,000+ Cr

held up across 10.46 lakh pending MACT cases nationally

11 lakh

claims pending in MACT courts (FY 2023)

3.6 years

average time to settlement, for those who persist

Deposited But Not Delivered:
Investigating India's Mountain of
Unclaimed MACT Compensation

MACT Awards: Crisis of Unclaimed
Motor Vehicle Compensation

Executive Summary

India's MACT system was created to ensure swift compensation for road crash victims. Despite legal entitlements, thousands of road crash victims never receive court-awarded compensation. Across five High Court jurisdictions, nearly ₹1,000 crore remains unclaimed. This brief highlights how information gaps, procedural hurdles, and weak post-judgment support leave awarded funds stranded, revealing a critical last-mile failure in delivering financial justice.

Context

Road accident victims in India are legally entitled to compensation through various schemes and through the Motor Accidents Claims Tribunal (MACT), which is meant to ensure quick and fair relief. However, a large share of compensation amounts often remain unclaimed, even after the award is passed.

WHAT OUR RESEARCH FOUND: 'DEPOSITED BUT NOT DELIVERED'

Families are never told

Withdrawal stalls on paperwork

Advocate incentives cut against families

Money that families have already won in court, deposited by insurers, sitting unclaimed. The Supreme Court took note in 2025 and ordered public dashboards and claimant tracing.

No proactive notification exists when an insurer deposits the award; many families learn months or years later, or never.

A 15–20 day process in theory; in practice, documents, missing bank details in older judgments, and office hand-offs stall it.

Consultations found contingency fees of 20–30%, and little reason for counsel to speed up the final hand-over.

UNCLAIMED, BY HIGH COURT

Bombay	₹459 Cr
Gujarat	₹282 Cr
Allahabad	₹239 Cr
Goa	₹3.6 Cr
Calcutta	₹2.5 Cr
Five HCs only	~₹986 Cr

Source: Supreme Court, In Re: Compensation Amounts Deposited with MACTs and Labour Courts (2025); CFI stakeholder consultations, Oct–Nov 2025. The national figure is likely far higher.

Crashfree India · Expression of Interest — Working Group 5

17 / 26

'Justice Unserved', the evidence base we built first

Published January 2026 · launched at IIT Delhi · findings presented to MoRTH · covered by national press.

The report, file reviews, RTIs and consultations across the pipeline.

Awareness

70% of low-income families are unaware compensation exists.

Timeliness

3.6-year average claim; MACT cases often run 8–10 years.

Documentation

90% of pending hit-and-run claims stall on documents alone.

Adequacy

Informal workers are often valued at minimum wage in courts.

Equity

14% of low-income households compensated vs 24% of high-income.

THE CLAIM RATE, NATIONALLY

68,584 hit-and-run crashes recorded in 2024

~30,000 of them kill, every year (MoRTH)

9,813 claims registered, FY 2025-26

7,348 claims paid, to 28 Feb 2026

About 1 claim for every 7 crashes, up 48x since FY23 (205), and still far from the loss. Source: Lok Sabha reply AU6419, April 2026.

Press: Deccan Herald · Economic Times · Fortune India · IndiaSpend · Scroll.in · The Wire, and cited in Parliament-facing briefings.

Working inside the district machinery

Not commentary from outside, formal seats, formal tasking, files on the table.

- 

Four DRSCs joined

Gurugram, South-West Delhi, North-West Delhi and Jaipur, with MoUs with Jaipur Traffic Police and Gurugram Police.
- 

File-level pipeline support

With district administrations we work the hit-and-run pipeline file by file, mapping where eligible families drop out, and helping offices close those gaps.
- 

Formally tasked

The South-West Delhi DRSC's signed minutes task Crashfree India with digitisation and analytics support for scheme files.
- 

Embedded presence

A research fellow sits with Gurugram district offices, implementation support, not external commentary.

Legal-rights helpdesk with district administration, Jan 2026.

Law-student volunteers after a hospital helpdesk drive.

With Rajasthan: from ground mapping to a working template

Supporting the State Road Safety Lead Agency and Transport Department on the Hit-and-Run Compensation Scheme.

~180

of ~395 monthly hit-and-run claims in Rajasthan come from Jaipur alone (~46%)

Not because crashes happen only there, because Jaipur runs active outreach and a single coordination cell. The template is replicable.

What holds claims back

11–13 documents demanded vs the 7 court-agreed standard · ~50% of files lack a usable family phone number · manual hand-offs between six offices.

The cautionary example

A state portal that changed how offices work saw monthly requests fall 350 → 25. Our design rule: no stakeholder changes their medium.

Office-by-office mapping

We walked the file's actual path, police, SDM office, insurer desk, treasury, and mapped every hand-off where families drop out.

Six asks → 60 days

Decisions identified with the Department that put Phase 1 (family traceability) in motion within 60 days.

Designed so no stakeholder changes how they work

Families stay on WhatsApp; officers keep their queues and sign-offs; the system connects them behind the scenes.

The Pre-Hospital Care Primer, our EMS evidence line

Published September 2025. Contributors include Dr. Sushma Sagar (AIIMS JPN Apex Trauma Centre) and Dr. Richa Ahuja (IIT Kharagpur).

The Primer, ERSS-112, global comparisons, state innovations.

Covered by Hindustan Times: *'India's Road Safety Primer Flags Gaps in Pre-Hospital Emergency Care.'*

The Chain of Survival, six links, benchmarked for India.

The response gap, measured

ERSS-112 is live across all 36 states & UTs, yet ambulance arrival averages 25–35 minutes, and the full care episode runs 55–75 minutes against a 60-minute golden hour.

State innovations documented

Maharashtra's MEMS, 937 ambulances under centralised dispatch; Tamil Nadu's TAEI trauma corridors, pre-arrival alerts and protocols.

The demand side too

Good Samaritan protections and the ₹1.5 lakh / 7-day Cashless Treatment Scheme 2025, explained in our public guides and helpdesks.

Ready for WG-5

A referenced baseline for the Group's EMS and trauma-care standards discussions, states already compared, gaps already mapped.

Helpdesks where families actually are: **trauma wards**

Hospital legal helpdesk, 100+ victims supported in the first four days of operation.

What the desk does

FIR follow-up, document checklists, DLSA referrals and compensation guidance, at the bedside, in Hindi.

Who runs it

Trained law-student volunteers under practising advocates, with Neev Foundation and DLSA coordination.

Where it grows

Gurugram and Delhi trauma wards first; the district toolkit makes it replicable wherever a DRSC wants one.

Backed by materials

The Hindi legal-rights guide and 'Meet Aasha' comics live at every desk, and Aasha continues the help at home, 24/7.

Numbers a standard can act on

Each one is a lever for a WG-5 standard, toolkit entry or communication norm, none requires new legislation.

921 of 1,026

hit-and-run claims pending nationally were stalled at documentation alone (RTI, July 2024)

The standard: A single national document checklist

11-13 vs 7

documents demanded of claimants in practice, against the court-agreed standard of seven

The standard: Enforce the seven-document standard

~50%

of case files lack a usable family phone number

The standard: A traceability norm at first contact

~60 days

typical intake delay where claims surface only through bi-monthly committee meetings

The standard: A time-bound intake standard

1 in 7

hit-and-run crashes becomes a claim: 9,813 claims against 68,584 crashes in 2024

The standard: Awareness and intake norms at scale

20-40

office visits for a family to keep a single claim alive today

The standard: A single-window process for families

The claim's other side: guidance from Justice J.R. Midha (Retd.), architect of the FaSTDAR process · consultations with insurers on settlement practice · working partners across MACT courts, DLSAs and legal-services clinics, Mishika Singh (Neev Foundation), Yash Agarwal (Public Policy India), Sanchit Seth (Advocate, Delhi MACT).

Four concrete offers to Working Group 5

All four are ready today, need no funding from the Board, and can begin within weeks.

1

A victim-side evidence base

'Justice Unserved', 'Deposited But Not Delivered', 120+ victim and family interactions, and file-level pipeline data showing precisely where eligible families drop out.

2

A district toolkit, drawn from practice

Working DRSC integration experience, agendas, file digitisation, fellow placement, ready to be codified into the Group's district toolkit.

3

A reusable state portal blueprint

The Rajasthan case-management design, guided filing, stage-wise visibility, single-pass clarification, offered as a template any state can adapt.

4

Standards input from the claimant's side

Document standards (the court-agreed 7), communication norms and timeline benchmarks, grounded in what families actually experience.

We would be honoured to contribute to Working Group 5.

Our evidence, our district relationships, our technology and our expert bench are available to the Board, in whichever form is most useful.

"We already know what is going wrong. What we need now is more responsibility, more discipline, more respect for life."
